SPECIAL NOTE—Read Carefully

We desire the names of persons who you know are interested in flowers and beautiful surroundings; those who are building fine new homes or have grounds that need landscaping. If you know of only one or two send them in to us with your order. It will be a favor to us and one we will appreciate.

NOTE—Please give street address with above names when necessary.
This Is Your NURSERY GUIDE

READ IT CAREFULLY. Your patronage, criticism and interest, as well as that of your grandparents, have made possible our 82 years of service in furnishing quality nursery stock.

- **FRUITLAND'S LANDSCAPE DIVISION.** Our Landscape Planning and Planting Service is in charge of experienced men. This most complete service is yours at reasonable prices.

- **PLANNING.** We are prepared to design the area which you wish to develop, regardless of the size, whether the home lot, church, school, estate or park.

- **PLANTING.** Our charges for this phase is most reasonable, as only trained men are used who execute expeditiously all planting.

- **MAINTENANCE.** Relieve yourself of the responsibility of caring for your grounds. FRUITLAND will care for your grounds full time, or while you are away through the summer. Perhaps you have a gardener whom you would like advised regarding spraying, etc. We have been very successful in pleasing our clients with this much-needed service. We should be glad to give you further information relative to this.

- **TREE SURGERY.** Trees are one of your most beautiful and valuable assets to the home grounds, and should be given every attention. FRUITLAND'S tree surgeons are expert in their line and have had wide experience.

- **PRUNING, SPRAYING AND LAWN PLANTING.** These necessary aids to the beauty of your grounds are attended to economically by us. Fashions change—even in landscape design. We strive for new ideals in beauty. New plants are introduced. Be modern—have FRUITLAND increase your property values by making your grounds more attractive. Our charges are really most reasonable, considering our service.

- **FRUITLAND'S 250-ACRE NURSERIES** are situated where there is a diversity of soils, making it possible for us to grow such a varied collection of beautiful plants and trees. From the propagating department, where hundreds of thousands of plants are started, to the final transplanting field, all plants are given every attention to help make them healthier and more beautiful, for these are your plants and we know that you do not want us to spare any expense to make them the pride of your grounds.

- **WHEN ORDERING,** use names as given in catalog, using the convenient order blank in this catalog. Do not forget to fill in your name and address, with shipping instructions. We are most careful in filling your orders, but you know to err is human, and when we make a mistake let us know at once and we shall make adjustments satisfactory to you. We, of course, cannot be responsible for loss of plants from sources beyond our control, such as lack of attention on buyer's part during spells of unfavorable weather.

**REPORT OF LOSS OF PLANTS MUST BE MADE WITHIN TWO WEEKS OF RECEIPT OF SHIPMENT.**

- **TERMS.** Our terms are cash, unless otherwise arranged in advance. On all C. O. D. orders we require a 25 per cent deposit in advance.

- **WE HAVE NO AGENTS.**

**GUARANTEE**

We guarantee every tree or plant to be in a perfectly healthy condition, up to grade and first-class in every respect when leaving our hands. Our Nurseries are free from disease. Certificate of State Entomologist is attached to every shipment. We fumigate our stock with hydrocyanic acid gas before shipping, as required by state law, so that the assurance of freedom from insects or disease of any kind is made doubly sure. We guarantee satisfaction. We are not responsible for more than the initial cost of plant involved.
Spring and Summer Blooming Bulbs

GLADIOLUS
The Most Satisfactory Cut Flowers

Fruitland Mixtures of Large-flowering Gladiolus
A splendid mixture of fine varieties. In it you will find a rich combination of bright-colored flowers.

DAAFFODILS
75c per doz.; $3.50 per 100.

The Emperor. Large yellow blooms. Empress. Trumpet yellow; perianth white.

$1.75 per doz.; $9.00 per 100

Gertrude. Brilliant pink.

JONQUILS
Campernelle rugulosa. Single; yellow; very fragrant. Larger than the plain Campernelle. $1 per doz.; $7.50 per 100.

NERINE SARNIENSE
Guerney Lily. $1.00 per dozen; $6.50 per 100.

SNOWDROPS
Too well known to need description. 75c per dozen. $5.00 per 100.

DARWIN TULIPS
50c per doz.; $4.00 per 100 (named varieties).

ZEPPHYRANTHES
Zephyranthes atamasco. (Zephyr or Fairy Lily). White flowers. Z. rosea. Pink flowers. 35c per doz.; $2.50 per 100.

Fruitland’s Reliable Flower Seeds

AGERATUM—Floss Flower
Blue Ball. Compact round plants, 6 to 8 in. tall. Pure blue flowers. Pkt. 10c; ¼ oz. 25c.

ANTIRRHINUM MAXIMUM—Giant Snapdragon
Canary Bird. Gigantic; canary yellow.
Fordhook Rose. Blending shades of rose-pink and yellow.
Orchid. Bright mauve-pink with deeper colored tube.
Sunnybrook. Combines rich shades of deep golden-yellow, salmon and orange.

HYacinths
$1.75 per doz.; $9.00 per 100

Gertrude. Brilliant pink.

CALEDULA—Scotch Marigold
Golden Ball (Ball’s Gold). Deep yellow. Pkt. 10c; ¼ oz. 25c.
Orange Ball. Orange blooms of great size. Free flowering. Pkt. 10c; ¼ oz. 30c.
Sunshine. Chrysanthemum-flowered; large, bright yellow flowers on stems 2 to 2½ ft. Pkt. 10c; ¼ oz. 30c.
Mixed. Giant double, the largest flowered varieties blended. Pkt. 15c; ¼ oz. 35c.

CARNATION—Chabaud’s Giant Improved
Mixed colors, hardy, deeply fringed. Pkt. 15c; ¼ oz. 50c.

COSMOS
Double Crested. Early. Colors crimson, pink, white. All colors mixed. Pkt. 15c; ¼ oz. 75c.
Orange Flame. Large orange-colored flowers, single, early. Pkt. 10c; ½ oz. 30c.
Sensation. Giant flowers, fluted petals. Mixed colors, pink and white, well blended. Pkt. 15c; ¼ oz. 30c.

DAHLIA
Decorative Double. Mixed. Large flowered formal and informal. Seed saved from choice varieties. Wide range of colors. Pkt. 25c; ½ oz. 75c.
Pompon. Small ball-shaped flowers, excellent for garden display. Good variety of colors. Mixed. Pkt. 25c; ½ oz. 75c.
Unwin’s Dwarf Hybrids. Early, semi-double strain of Dahlia in a wide range of colors. Grows 2 ft. tall. Flowers first year from seed. Mixed. Pkt. 15c; ¼ oz. 60c.

WE GUARANTEE ARRIVAL OF ALL OUR PLANTS AND SHRUBS TO BE IN PERFECT CONDITION
DELPHINIUM—Hardy Larkspur
Choice Mixed, Gold Medal. Large, single, semi-double and double flowers closely set on tall spikes. Many colors and variations. Pkt. 15c; ½ oz. 35c.

DIANTHUS—Hardy Garden Pinks
Plumarius, Double Mixed. Double and semi-double spicy blooms. 18 in. Pkt. 10c; ½ oz. 35c.
Plumarius, Single Mixed. Large single fringed-edged blooms in many showy colors and markings. 18 in. Pkt. 10c; ½ oz. 30c.

ESCHSCHOLTZIA—California Poppy
Aurantiaca. Deep golden yellow. Pkt. 10c; ½ oz. 25c.

GAILLARDIA—Blanket Flower
Grandiflora Hybrids. Gorgeously colored, daisy-like flowers from June to October. Flowers from seed first year if sown early. Double and single flowers in shades of yellow and mahogany. Pkt. 10c; ½ oz. 25c.

GERBERA—African Daisy
Gerber Jamesoni Hybrids. Large attractive daisy-like blooms 2 to 4 inches across. Our mixture contains shades of yellow, orange, salmon, white, scarlet, crimson, pink, rose, coral, etc. Hardy in frost-free locations. Splendid for cuttings. Flowers long keepers. Pkt. (25 seeds) 25c; 100 seeds 75c.

GOURDS
Ornamental Gourds. Fine Mixed. Many sorts. Pkt. 10c; ½ oz. 20c.

HELIOTROPE
Giant Hybrids, Mixed. Fragrant flowers ranging in colors from pure white to violet-blue. Pkt. 15c; ½ oz. 50c.

HOLLYHOCKS—(Perennial)
Double, Crimson. Pkt. 10c; ½ oz. 35c.
Double, Newport Pink. Pkt. 10c; ½ oz. 35c.
Double, Mixed Colors. Pkt. 10c; ½ oz. 30c.

IBERIS—Annual Candytuft
Pkt. 10c; ½ oz. 25c.
Umbellata, Carmine.
Umbellata, Lilac.
Umbellata, Rose-Cardinal.
Umbellata, White.
Mixed Colors: Pkt. 10c; ½ oz. 25c.
Semprevirens (Perennial Candytuft). Old favorite for edging rock gardens or beds. White. Pkt. 15c; ½ oz. 50c.

IMPATIENS—Sultan’s Balsam
Holstii Hybrids. Includes white, flesh-pink, pink, rose, salmon, orange, carmine, crimson, and violet shades. Give sunny or semi-shaded situation. Plants grow 1 to 2 feet tall. Pkt. 20c; ½ oz. 70c.

LARKSPUR—Annual
Tall, stately, double, stock-flowered Larkspur in wide range of colors.
Azure Blue. Also called Ageratum Blue.
Dark Blue. Combines well with other blues.
Sky Blue. Very bright and showy.
Carmine. Also known as Newport Pink.
Lilac Improved. Very appealing.
Los Angeles. Brilliant rose on salmon background.
Violet. Intense, rich color.
White.
Pkt. 10c; ½ oz. 25c; ½ oz. 40c.
Mixed Colors. Containing above varieties—nicely blended.
Pkt. 10c; ½ oz. 30c; ½ oz. 55c; 1 oz. 90c.

LUPINUS—Lupine
Long graceful spikes of pea-shaped flowers from July to August. Hartwegii varieties:
Blue Rose Pkt. 10c; ½ oz. 25c.
White Mixed Colors: Pkt. 10c; ½ oz. 20c.

MARIGOLD
Dixie Sunshine (Dwarf French). Clear, bright yellow, double flowers of pompon shape. Late flowering. Pkt. 15c; ½ oz. 45c.
Dwarf Mexican Orange. Immense double ball-shaped flowers. Blooms early and freely. Pkt. 15c; ½ oz. 45c.
Surprise Mixture. Many different shapes and colors. Some bloom early, mid-season, and late. Pkt. 25c; ½ oz. 60c.
Tail African Double, Mixed Colors. Immense, ball-shaped, double blooms on stiff stems. 2½ ft. Pkt. 10c; ½ oz. 25c.

NASTURTIUMS
Double Hybrids. All colors, large double and semi-double flowers on long stems. Sweet-scented. Pkt. 10c; oz. 25c.
Golden Gleam. Rich golden yellow, sweet-scented, double or semi-double. Pkt. 10c; oz. 20c.
Gorgeous Dwarf Mixed. Single; all colors. Blooms freely. Pkt. 10c; oz. 20c; or 4 oz. 50c.

NEMOPHILA—Baby Eyes
Insignis Blue. Quick grower; early and free bloomer. Lovely, cup-shaped, sky-blue flowers with white centers. Charmin for edgings and rock gardens. Pkt. 10c; ½ oz. 25c; oz. 75c.

PANSIES
Jumbo Mixed. Giant flowers. Early blooming. All outstanding colors. Pkt. 50c; ½ oz. $1.25; ½ oz. $2.25.

PETUNIAS
BEDDING
Rosy Morn. Soft rose-pink with broad white throat. Pro fuse bloomer. Pkt. 15c; ½ oz. 50c.
Enchantress Mixture. Includes full range of colors. Excellent for beds and borders. Pkt. 10c; ½ oz. 35c.

BALCONY
Blue. Pkt. 15c; ½ oz. 40c.
Rose. Pkt. 15c; ½ oz. 40c.
Star of California. Velvety violet, shaded crimson, with pure white blottches. Pkt. 15c; ½ oz. 40c.

GIANT-FLOWERED
Elk's Purple or Pride. Large rich deep purple with velvety black veils. Pkt. 25c.
PHLOX DRUMMONDI GRANDIFLORA

ANNUAL PHLOX

Well branched, 15 in. tall, with large flower heads.
Apricot. Bright chamois-rose with white eye.
Ruby. Glowing ruby-red.
Violet. Bright violet.
White. Large, pure white.

Above named varieties: Pkt. 10c; 1 oz. 30c; 1/2 oz. 50c.
Mixed Colors: Pkt. 10c; 1/2 oz. 25c; 1/4 oz. 40c; 1/2 oz. 70c.

POPPIES, ANNUAL

Peony-flowered, Double, Mixed. Pkt. 10c; 1/2 oz. 15c; 1/2 oz. 25c.
Shirley Improved, Single, Mixed. Pkt. 10c; 1/4 oz. 20c; 1/2 oz. 30c.
Shirley, Double Hybrids, Mixed. Pkt. 10c, 1/4 oz. 25c; 1/2 oz. 40c.

PORTULACA—Sunplant

Portulaca. Rose Moss—Sun Plant. Compact, spreading plants, 8 in. tall. This mixture contains many bright colors. Single. Pkt. 10c; 1/4 oz. 25c; 1/2 oz. 40c.

SALVIA—Scarlet Sage

Bonfire (Clara Bedman). Scarlet flowers. Grows 2 feet tall. For bedding and bordering. Pkt. 15c; 1 oz. 50c.
Splendens. Red spikes, 3 to 4 feet tall. Pkt. 10c; 1/2 oz. 40c.

STOCKS

Early Giant Imperial. 2 to 2 1/2 ft. tall, Mixed colors. Pkt. 15c; 1/4 oz. 60c.

SWEET PEAS

Mixed. Large-flowering; assorted colors, single. Pkt. 10c; oz. 25c; 4 oz. 60c; 1/2 lb. $1.10; 1 lb. $2.00.
Ruffled Mixed. Flowers large, duplexed, and so much ruffled as to appear double. Wide range of desirable colors. Pkt. 25c; 1/2 oz. 35c; oz. 60c.

SWEET WILLIAM—Dianthus

TITHONIA—Mexican Sunflower

Speciosa. Stately plants growing about 10 ft. tall, carrying a great quantity of brilliant orange-scarlet blooms, 3 to 4 in. in diameter. Good for background and for cutting. Blooms profusely in late summer and fall. Pkt. 15c; 1/2 oz. 40c.

TESTIMONIALS

I wish to compliment you as to the quality of the plants and the method of packing. We were all very much impressed as we had never before received a shipment as satisfactory as yours. Several interested parties have seen these plants and you need not fear that they will be better. As for myself, I will be ordering again very soon.

A. J. H., Fresno, Cal.

Many thanks for my beautiful plants. They were faultlessly packed.

Mrs. S. F. A., Tuscaloosa, Ala.

The Hibiscus, etc., which you sent me, came duly to hand in excellent shape and were promptly put in the ground.

L. H. B., Pasadena, Cal.

The Camellias came in fine shape.

Hoquiam, Wash.

A short time ago I received an order of shrubs and trees from your Nursery and thought you would like to know that they were in as nice a condition as any that I have never received.

J. A. C., Bremerton, Wash.

Fruitland

LAWN SEED

- In the South the best period for lawn-making is from September to December—the earlier the better. Do not attempt to make a lawn during very dry or extremely windy weather. In preparing the soil it should be plowed as deep as possible and then subsoiled, harrowed, and all stones removed. If plowing is not practical, have the ground spaded carefully and thoroughly. To feed the grass, use sheep-manure at the rate of 1,000 pounds to the acre, or home-made at the rate of 800 pounds to the acre. Work this food well into the soil, level the ground, and rake perfectly smooth. Broadcast the seed at the rate of 75 to 100 pounds to the acre (210 by 210 feet), rake lightly, cover the seed, and then roll. If you cannot get a roller, firm the soil with a plank or flat tamper. During hot, dry weather use a lawn-sprinkler or spray-nozzle after sunset—do not spray when the sun is shining, nor apply the water with great force. During prolonged dry spells, water each evening. Established lawns may be lightly reseeded each autumn, covering the bare spots and insuring a substantial turf.

Centipede Grass Cuttings........................................ $2.50

Becoming popular in this section. The blade of this grass is not as wide as the Charleston Grass.

Charleston or St. Augustine Grass Cuttings.................. 2.50

Wide-blade grass, suitable for summer lawns.
**Flowing Shrubs from Fruitland Nurseries**

**We Guarantee Live, Healthy Quality Stock at LOWEST PRICES**

- FLOWERING SHRUBS give the finishing touch so much required by small and large home-gardens. When properly arranged, shrubs will soften the lines of the foundation, will provide an effective border or screen, will cover the edges of walls and screen objectionable views. Shrubs may also be used for covering slopes and for dividing the landscape into small sections, and for bordering the outdoor living-room of small homes. A selection of varieties will give a succession of flowers from spring until late autumn and after the foliage has fallen the brilliant berries and branches add color and cheer to the winter landscape.

All of these advantages and many more will come from a proper selection of Flowering Shrubs, and a small investment will pay for itself many times over by increasing the value of your property and your satisfaction in ownership.

The figure after each variety denotes ultimate height of plant.

**ALTHAEA frutex.** See Hibiscus syriacus.

**BUDDLEIA—Butterfly Bush**

*Buddleia davidii* magnifica (Oxeye Butterfly Bush). 8 ft. Flowers a deep shade of violet. Plant is a tall grower, and blooms from June until frost. Very ornamental. Should be cut to within 12 inches of ground in late winter, thus giving more blossoms and making a more shapely plant. The blossoms are on the current year’s growth. A Chinese shrub.

**AZALEA**

When planting Azaleas, soil from the woods should be used and plants mulched with half-rotted leaves, thus reproducing, as nearly as possible, their native environment.

*Azalea calophylla* (Great Flame Azalea). 6 to 10 ft. One of the many beautiful native flowering plants which grow throughout the eastern states. The blossoms appear in April, in clusters, and are of various colors—yellow, orange, buff and various shades of red. We offer a variety of colors, but plants are not separated as to color.

*Azalea nudiflora* (Pinxterbloom; Wood Honeysuckle). 6 to 10 ft. The well-known native variety which produces fragrant, pinkish white blossoms in April before the leaves appear.

**CHILOPSIS**

Desertwillow

*Chilopsis linearis*, 20 ft. A large shrub native to Texas and Mexico. Narrow willow-like foliage; handsome, trumpet-shaped lilac and yellow flowers produced from July until frost.

- Each 10
- 4 to 5 ft. $1.00
- 3 to 4 ft. $0.75
- 2 to 3 ft. $0.60
- 18 to 24 in. $0.50

**CHIONANTHUS**

Fringetree

*Chionanthus virginica* (White Fringetree), 10 ft. A native, white flowering shrub, known locally as Grandaddy’s Gray Beard. Flowers in May.

- Each 10
- 2 to 3 ft. $0.65
- 18 to 24 in. $0.50

**CUDRANIA—Silkworm Tree**

*Cudrana tricuspidata* (Vinearia). Chinese Silkworm Tree, 20 ft. A thorny shrub, or small tree, producing edible red fruits.

- Each 10
- 4 to 5 ft. $1.00
- 3 to 4 ft. $0.60
- 2 to 3 ft. $0.75
- 18 to 24 in. $0.50

**CYDONIA—Japan Quince**

*Cydonia japonica* (Flowering Quince), 6 ft. One of the most showy early-flowering shrubs, commencing to bloom in late winter, followed by quince-like fruits in August, which may be made into preserves and jellies. We offer mixed colors only.

- Each 10
- 2 to 3 ft. $1.00
- 18 to 24 in. $0.60

**CYTISUS—Scotch Broom**

*Cytisus scoparius* (Jack-go-to-bed-at-noon). 10 ft. A native of Europe. In April this plant is a mass of golden yellow, pea-shaped flowers. Stems, being green give this the appearance of an evergreen shrub.

- Each 10
- 18 to 24 in., heavy $0.60
- 12 to 18 in. $0.35

**DEUTZIA**

*Deutzia scabra* (Pride of Rochester), 6 ft. Double white, back of petals faintly tinted with pink; large panicles; blooms middle of April, and continues to bloom three or four weeks.

- Each 10
- 4 to 5 ft. well branched $0.75
- 3 to 4 ft. well branched $0.60
- 2 to 3 ft. well branched $0.50
- 18 to 24 in. well branched $0.35

**EXOCHORDA—Pearl Bush**

*Exocharoides grandiflora*, 10 ft. A desirable, large shrub, from China, with pure white flowers produced in great profusion about the middle of March. When in full bloom the plant has the appearance of a snowbank, and when planted in a mass is most conspicuous. Does not require much pruning.

- Each 10
- 4 to 5 ft. $0.80
- 3 to 4 ft. $0.75
- 2 to 3 ft. $0.60
- 18 to 24 in. $0.35

**FORSYTHIA—Golden Bell**

Splendid old shrub with bright yellow, bell-shaped flowers which appear in the spring before the leaves come out. Sometimes the Forsythia is confused with the winter jasmine. The upright forms make excellent hedges, and good fillers for massed shrubs.

*Forsythia intermedia* (Border Forsythia), 6 to 8 ft. A tall variety with slender, arching branches. Flowers golden yellow, produced in great profusion. Blooms in March.

*F. intermedia spectabilis*, 6 to 8 ft. The most beautiful of the Golden Bells. Profusion of large bright yellow flowers in March.

*F. suspensa* (Weeping Forsythia), 6 to 8 ft. A graceful variety with long, slender drooping branches. Leaves dark, shining green. Flowers yellow, produced in great profusion in March, 2 to 3 ft. only.

*F. suspensa fortunei* (Fortune Forsythia), 6 to 8 ft. Similar to *F. suspensa*, but habit is more upright and vigorous. Flowers golden yellow, frequently with twisted petals. A desirable variety. Blooms in March.

*F. viridissima* (Greenstem Forsythia), 6 to 8 ft. Flowers golden yellow, produced in great profusion last of February or early in March. Most effective when planted in large groups.

All Forsythias:

- Each 10
- 4 to 5 ft., well branched $0.65
- 3 to 4 ft., well branched $0.55
- 2 to 3 ft., well branched $.40

**FOTHERGILLA**

*Fothergilla gardenii*, Dwarf Fothergilla. 3 ft. A native small shrub, having in April numerous spikes of slightly fragrant white flowers.

- Each 15 to 18 in. $0.75

**GORDONIA**

*Gordonia alatamaha* (Franklinia alatamaha), 15 to 20 ft. Very rare. Blooms from early August until frost. Blooms very large, snowy-white with golden yellow stamens; breathes forth a delicate, balmy fragrance. Very desirable.

- Each 10
- 4 to 5 ft. $3.00
- 2 to 3 ft. $2.50

**HALESIA—Silverbell**

*Halesia tetraptera* (Silverbell), 15-18 ft. Masses of snow-white, bell-shaped flowers, which bloom in early spring along with Dogwood.

- Each 5 to 6 ft. $1.60
HYPERICUM—Gold Flower

Hypericum moserianum. 2 ft. A beautiful dwarf shrub; in this section almost an evergreen. Leaves dark green. Large, single, bright golden yellow flowers 2 inches in diameter. A very desirable plant. Blooms from early May throughout the entire summer and most effective when planted in masses.

Each 10
2-yr ...................................... $ .50 $4.50

JASMINUM—Jasmine

J. primulinum (Primrose Jasmine). 10 ft. Evergreen in this section, but farther north loses its foliage in winter. An improvement upon J. nudiflorum.

J. stephanense, Semi-climbing hybrid, hardy to Philadelphia. Fragrant, pale pink flowers, produced in clusters in late April.

Above Jasminums:

Each 10
3 to 4 ft. (Primulinum only) ........................................ $ .60 $8.00
18 to 24 in. .................................. .50 .45

KOLKWITZIA—Beauty Bush

Kolkwitzia amabilis. 6 ft. A charming new shrub from China. It is hardy in the New England States. Has general resemblance to weigela and honeysuckle, the beautiful trumpet-shaped flowers appearing in abundance in April. Flowers pale pink, with orange veins in throat; buds darker.

Each 10
2 to 3 ft. .................................. $ .50 $4.50
18 to 24 in. .................................. .50 .35

LAGERSTROEMIA—Crape Myrtle

Crape Myrtles will sometimes remain dormant, not putting out leaves for a year. They should be cut back, kept watered and the ground around them loosened lightly.

If Crape Myrtles are severely pruned and well fertilized in February, the blossoms during that season will be much more beautiful. During wet seasons these plants are attacked by thrip which turns the foliage black. Two sprayings will usually control this, one as soon as it is noticed on plants; another two weeks later. Use 1/4 pound Bordeaux mixture and 5 teaspoonfuls Black-Leaf 40 to each 3 gallons of water.

Lagerstroemia indica (Crape Myrtle). 20 ft. A popular and free flowering shrub, or small tree, which produces blooms in great abundance throughout the summer. The flowers are beautifully fringed and are borne in large clumps. A massing of these, or a single specimen, makes a most striking effect. Commences to bloom in June. All plants will be pruned before shipping. First year blooms not always true. Write for prices in larger quantities. Crimson, pink and white.

Each 10
4 to 5 ft. .................................. $1.00 $9.00
2 to 3 ft. .................................. .75 .65
18 to 24 in. .................................. .50 .45

Specimen plants in crimson and pink only—$3.00 to $5.00 each.
LONICERA—Honeysuckle

Lonicera fragrantissima (Winter Honeysuckle). 8 ft. A Chinese shrub. Highly esteemed for its exceedingly sweet-scented pinkish white flowers, which appear in January. The plant continues to bloom for a long time. To keep shapely plants which will give a maximum of bloom, they should be pruned severely and old wood removed directly after flowering every year.

Climbing Honeysuckle—See page 35

MERATIA—Calycanthus

Meratia praecox (Wintersweet). 10 ft. A Chinese shrub producing exquisitely fragrant yellow flowers, usually about January 1, and lasting for about four weeks. The flowers appear before the leaves, and when in full bloom it is a most pleasing plant. It blooms at a period when our gardens are destitute of flowers.

PHILODELPHUS—Mockorange

Phiadolphus gordonianus (Gordon Mockorange). 10 ft. Leaves broad, bright green; flowers pure white, produced in dense racemes; blooms late.

P. grandiflorus (Big Scentless Mockorange). 10 ft. A conspicuous variety. Very large white flowers.

P. laxus (Drooping Mockorange). 10 ft. Flowers very large, white, produced in clusters. Desirable. Late bloomer.

P. virginai. 4 to 6 ft. A handsome, vigorous-growing shrub with large, semi-double, fragrant flowers, sometimes 2½ inches across, which are produced in great profusion the latter part of April and early May. Also blooms during the summer.

PRUNUS

Prunus glandulosa glabra alibiplana (Double White-Flowering Almond). 4 to 6 ft. A beautiful dwarf shrub, producing in early spring, before the leaves appear, a mass of small, double white flowers. One of the best early-flowering shrubs.

P. glandulosa trichostyla sineis (Double Pink-Flowering Almond). 4 to 6 ft. Same as the Double White-Flowering Almond, except the flowers are pink. Very beautiful.

P. tomentosa. 10 ft. Bush or very small tree, bearing white tinted flowers early in spring, followed by cherry-like edible fruit about ½ inch in diameter, of reddish color.

Above four varieties: Each

| 2 to 3 ft. | $ .85 |
| 3 to 4 ft. | .75 |

P. mume (Japanese Apricot). 10 ft. A very early blooming variety. In January the tree is literally covered with a mass of double pink blossoms, making a most conspicuous tree for a lawn. Very scarce.

<table>

PUNICA—Pomegranate

Valuable summer-flowering, tall-growing shrubs, perfectly hard in the South. Flowers are produced in great profusion early in May and last almost during the entire summer. Foliage bright, lustrous green. Very conspicuous and desirable. Prune in late winter, as blossoms are made on current year’s growth.

Punica granatum alba. 20 ft. Double; white.

P. granatum rubra. 20 ft. Beautiful, double, red flowers.

P. granatum variegata. 20 ft. Sometimes red and variegated double blooms will appear on the same plant.

All Punicas: Each

| 4 to 5 ft., well branched | $ .85 |
| 3 to 4 ft., well branched | .75 |
| 2 to 3 ft., branched | .50 |

SALIX—Pussy Willow

Salix discolor. 8 ft. The well-known Pussy Willow, with silky catkins which precede the leaves in early spring. 2 to 3 ft., 50c each; $.50 per 10.

SALVIA—Autumn Sage

Salvia greggi (Autumn Sage). 4 ft. A native of western Texas, and is, therefore, extremely hardy. It can stand zero weather and resists drought. Carmine flowers come in early spring and continue until frost. Effective for massing.

INCREASE YOUR PROPERTY VALUE WITH PRODUCTS FROM FRUITLAND NURSERIES
SPRING-BLOOMING SPIREAS

To keep shapely plants which will give a maximum of blooms, they should be pruned severely, and old wood removed directly after flowering every year.

Spiraea prunifolia plena (Double Bridal Wreath). 4 to 8 ft. From Korea. A beautiful early-blooming variety, with small, double white flowers. Commences to bloom in early March.

S. reevesiana (Reeves Single). 4 to 8 ft. From China. Produces large clusters of single white flowers, covering the entire bush.

S. reevesiana lanceata (Reeves Double). 4 to 8 ft. Large, round clusters of double white flowers cover the entire plant. Blooms latter part of March and continues for several weeks.

S. vanhouttei (Vanhoutte Spirea). A graceful shrub growing 6 to 8 ft. in height. Produces a profusion of single white flowers during the latter part of March. One of the most popular Spireas.

Above four Spireas:

PERPETUAL-BLOOMING SPIREAS

Spiraea, Anthony Waterer. 3 to 5 ft. A remarkably free-flowing shrub with upright branches. Leaves bright green, with frequent variegations of yellow. Flowers rose colored. If blooms are cut off as soon as they begin to fade, the plant will bloom the entire season. Makes a low-growing hedge.

S. froebeli (Froebel Spirea). 3 to 5 ft. Fine, free-growing sort. Rosy colored flowers, produced last of April in large, flat heads. The young foliage is tinted dark red.

STACHYURUS

Stachyurus praecox. 12 ft. Flowering shrub from Japan, producing bell-shaped yellow flowers in racemes to 3 inches long. Greenish yellow fruit. Blooms in February and March.

From pots .............................................$1.00

SYMPHORICARPOS—Snowberry

(St. Peter’s Wort)

Symphoricarpos chenaulti. 3 ft. The most desirable Snowberry. Graceful, compact; small foliage. Bears fruit of white to pink color. Of hybrid origin.

S. racemosus (Common Snowberry). A very graceful shrub, growing 4 to 6 ft. tall, with slender drooping branches. Flowers white, followed by clusters of white berries which remain upon the plant for months. A native to North America.

S. vulgaris (Coralberry). 4 ft. A native shrub growing naturally from New York to Texas. Purplish red berries, produced in great profusion, remain upon the plant all winter, making it especially desirable for landscape planting.

All Symphoricarpos: Each 10
2 to 3 ft. ...........................................$ .60 $ .50
18 to 24 in. ........................................ .50 4.00

SYRINGA—Lilac

Syringa persica (Persian Lilac). 6 ft. Slender arching branches. Flowers pale lilac or whitish, in rather loose panicles. May and June.

From pots .............................................$1.00

S. persica laciniata (Cutleaf Persian Lilac). 6 ft. Foliage finely cut. Light purple blossoms in April have the customary lilac odor. Not attacked by diseases or insects.

All SYRINGA—Lilac: Each 10
2 to 3 ft. ...........................................$ .60 $ .50
18 to 24 in. ........................................ .50 4.00

VIBURNUM—Snowball

Viburnum opulus sterile (Common Snowball). 8 ft. Large, globular clusters of white flowers in early April. An old favorite. From Asia.

V. tomentosum plicatum (Japanese Snowball). 8 ft. A beautiful variety of upright, bushy growth; produces heads of white flowers in great profusion. Far superior to the old Snowball. Blooms early in April; lasts several weeks.

All Viburnums: Each 10
4 to 5 ft., heavy ....................................$1.25 $10.00
3 to 4 ft., branched ................................ 1.00 8.50
2 to 3 ft., branched ................................ .75 6.00

VITEX—Chaste or Hemp Tree

Vitex agnus castus (Lilac Chaste Tree). 10 ft. This is a valuable large shrub, growing tree-like in the South. A native to Southern Europe. Handsome, aromatic foliage. Lilac-blue flowers on long spikes freely produced in late June, lasting about a month.

V. agnus castus alba (White Chaste Tree). 10 ft. Same as above, but with white flowers.

All Vitex: Each 10
3 to 4 ft. ............................................$1.00
2 to 3 ft. ............................................. .75
18 to 24 in. ........................................ .50

WEIGELA—Diervilla

Hardy, profuse-blooming shrubs of spreading habit. Among the best of the garden shrubs, producing in early April great masses of showy flowers.

Weigela hybrids (Snow Weigela). 6 ft. Pure white. Excellent.

W. hybrida, Eva Rathke. 6 ft. Flowers deep carmine-red. Profuse bloomer and continues in bloom for a long time.

W. hybrida, Mt. Blanc. 6 ft. Blooms similar to Candida, except that flowers at first are white, later turning to light pink.

W. rosea (Pink Weigela). 6 ft. Flowers are light pink. Compact grower; free bloomer.

All Weigelas: Each 10
3 to 4 ft. ............................................$ .65 $ .55
2 to 3 ft. ............................................. .50 4.50
18 to 24 in. ........................................ .35 3.00

WE INVITE YOU TO VISIT OUR NURSERIES WHEN IN OR NEAR AUGUSTA.
For Shade and Flower TREES GROWN BY FRUITLAND

“I Think I Shall Never See a Poem as Lovely as a Tree”

FRUITLAND NURSERIES, realizing that here in the South it is almost imperative that we have shade trees, grows an unusually large variety. Certain of these varieties will not grow tall enough for much shade, their merits being beautiful foliage, as in the Red Leaf Maple; lovely flowers in the Dogwoods; tall screens or accents with the Lombardy Poplars. With FRUITLAND trees you may have wonderful shade; magnificent flowers; glorious autumn coloring in foliage and fruit, and the grotesque with certain weeping trees.

The figure after each name denotes ultimate height of plant.

Acacia (Mimosa). See Albizzia.

ACER—Maple

Acer palmatum atropurpureum (Japanese Red-Leaf Maple). 25 ft. Foliage and shoots colored bronz-y-red. Should be planted in a moist position where it will not receive the hot afternoon sun. Rather a shrub in the South.

Each
2 to 3 ft. .......................... $3.00
18 to 24 in. ........................ 2.00

ALBIZIA—Mimosa

Albizia julibrissin (Acacia julibrissin; Silk Tree). 20 ft. A rapid-growing tree with spreading branches and a low, flat-topped head. Foliage fine and feathery. The large heads of pink flowers are borne at tips of branches the middle of May and continue for several weeks. A native of Persia and Japan, but naturalized in the South.

Each 10
8 to 10 ft., heavy $3.00 $27.50
8 to 8 ft. .......................... 2.00 17.50
6 to 6 ft. .......................... 1.00 8.50
4 to 5 ft. .......................... .50 4.50
3 to 4 ft. .......................... .35 3.00

ALEURITES—Tung-oil Tree

Aleurites fordii. 30 ft. A medium-sized tree indigenous to central China. The rather large, apricot white flowers, which appear in large numbers in April, with the broad, handsome, green leaves following, making the tree a valuable ornamental. It thrives best in well-drained and sand-clay loams. The tree is reported to live to the age of thirty years or more. Its apple-like fruits contain several large nut-like seeds which yield the valuable tung-oil or China wood oil of commerce, used exclusively in paints and varnishes.

Each
  10
  2 to 3 ft. .......................... $1.25 $19.00 $80.90
  3 to 4 ft. .......................... .75 6.50 50.00
  4 to 5 ft. .......................... .50 4.50 35.00
  5 to 6 ft. .......................... .35 3.00 25.00
  6 to 7 ft. .......................... .25 2.00 15.00

AMYGDALUS—Flowering Peach

During March the Flowering Peaches are covered with a mass of beautifully formed and highly colored double flowers. These trees cannot be too highly recommended for early spring blooming. Perfectly hardy, thriving in any soil in which other Peaches grow.

All Amygdalus:
Each 10
1-yr. to 5 ft. .......................... $1.00 $9.00
1-yr. to 3 ft. .......................... .65 7.50
1-yr. to 2 ft. .......................... .65 5.00

CERASUS (Flowering Cherry). See Prunus.

CERCIS—American Redbud

Cercis canadensis. 30 ft. A fast-growing, round-headed tree with large, leathery, heart-shaped leaves. The last of March, before the foliage appears, the tree is covered with a profusion of delicate reddish purple flowers.

Each 10
8 to 10 ft. .......................... $1.50 $12.50
6 to 8 ft. .......................... 1.25 10.00
5 to 6 ft. .......................... .85 7.50
4 to 5 ft. .......................... .65 5.50

C. canadensis alba. 30 ft. Same as Cercis canadensis, except flowers are white.

Each
3 to 4 ft. .......................... .50 4.00
2 to 3 ft. .......................... 1.00

CORNUS—Dogwood

Cornus florida (Flowering Dogwood). 40 ft. The native, large, white-flowering Dogwood. A most effective plant for the lawn.

Each 10
5 to 6 ft. .......................... $1.75 $13.75
4 to 5 ft. .......................... 1.25 11.00
3 to 4 ft. .......................... .85 7.50
2 to 3 ft. .......................... .65 5.50

Each
2 to 3 ft. .......................... $1.50
18 to 24 in. ........................ 1.00

C. florida rubra (Red-flowering Dogwood). 25 ft. Similar to the White-flowering Dogwood, but the flowers are of a deep rose color. Early in the season it produces large quantities of blooms, making it a most effective tree for single specimens on the lawn, and for mass planting with a background of tall evergreens. It is considered one of our outstanding flowering trees.

Each
4 to 5 ft. .......................... $4.00
3 to 4 ft. .......................... 2.75
2 to 3 ft. .......................... 2.00
18 to 24 in. ........................ 1.00

YOUR HOME, SURROUNDED WITH WELL-KEPT FRUITLAND PRODUCTS, HAS GREATER VALUE
KOELREUTERIA—
Golden Rain Tree

Koelreuteria paniculata. 25 ft. An ornamental shade tree from China. The leaves are broad and flat, coarsely toothed on the edges, and carried in flat heads. When the foliage first opens in spring it is dull red, later turning to dark green. The latter part of May large clusters of yellow flowers are produced for about three weeks—completely covering the head of the tree. The flowers are followed by round seed-pods, making the tree attractive after the bloom disappears.

Each 10
6 to 8 ft. $1.50 $4.00
5 to 6 ft. $1.00 .75
4 to 5 ft. $1.00 .75
3 to 3 ft. $1.00 .75

LIRIODENDRON—Tulip Poplar

Each 10
2 to 3 ft. $ .30 $ .40

MAGNOLIA

Magnolia acuminata (Cucumber Tree). 100 ft. Beautiful native pyramidal tree with very lush green leaves about 10 inches long.

Each 10
4 to 5 ft. $1.50
3 to 4 ft. $1.00
2 to 3 ft. $ .75

M. liliflora (Chinese Purple Magnolia). 25 ft. Makes a small tree of compact growth. Large purple and white flowers are produced in great profusion the latter part of March and scattering blooms the entire summer. 18 to 24 in. to 6 to 8 ft.

M. liliflora nigra (Purple Red Magnolia). 25 ft. A free bloomer, beginning in March and blooming sparsely during the entire summer. 18 to 24 in. to 4 to 5 ft.

M. macrophylla (Large-leaved Cucumber Tree). 50 ft. Quick grower with large leaves and white cup-shaped flowers 10 to 12 in. across; fragrant. Desirable as shade tree. 2 to 3 ft. only.

Preceding three Magnolias:

EVERGREEN MAGNOLIAS. See page 22.

MALUS—Flowering Crab-Apple

The Flowering Crab can be planted as shrubs on the lawn or in masses, either in the border or open lawn.

Malus loensis bechertii (Betchel Double-flowering Crab). 8 ft. The flowers of this sweet scented Crab resemble small pink roses. Very hardy and good for individual planting.

M. stellata (Star Magnolia). 8 to 10 ft. Shrub or small tree having very fragrant star-shaped white flowers. Quite hardy and very free-flowering. It begins to bloom when hardly 2 feet high.

Each
3 to 4 ft. $6.00
2 to 3 ft. 5.00
18 to 24 in. 3.00

MELIA—China Tree

Each 10
6 to 8 ft., well branched $2.50 $22.50
5 to 6 ft., well branched $1.50 12.50

MORUS—Mulberry

Morus alba pendula (Weeping Mulberry). 10 ft. A beautiful and hardy tree, forming a perfect umbrella-shaped head, with long, slender, willowy branches drooping to the ground. Desirable for lawns, parks and cemeteries. 5 to 7 ft. stems, 2-yr. heads, 75 each; $6.50 per 10.

NYSSA—Black Gum

Nyssa sylvatica (Tupeo; Sour or Black Gum). 100 ft. A native tree of robust habit, slowly growing naturally from Maine to Texas. Leaves dark, shining green, in autumn assuming tones of red and scarlet, which makes it most desirable. Fruit dark blue.

Each 10
4 to 5 ft. $1.50
3 to 4 ft. 1.00
2 to 3 ft. .50

OAK. See Quercus.

PLATANUS—
Plane Tree

Platanus occidentalis (American Plane Tree; Sycamore). 80 ft. The well-known variety extensively used for street and park planting, especially where there is smoke.

Each 10
10 to 12 ft. $2.50 $22.50
8 to 10 ft. $1.50 $15.00
6 to 8 ft. $1.00 $ 8.50

Texas Umbrella Tree
POPULUS—Poplar

Populus nigra italica (Lombardy Poplar). 40 to 50 ft. The well-known Italian variety. A tall, pyramidal, compact and rapid-growing tree, extensively planted in the southern part of Europe. Very desirable where a formal effect is wanted.

P. simoni fastigiata (Simon Poplar). 40 to 50 ft. A remarkable variety of the small-leaf Chinese Poplar. Of pyramidal habit, resembling the Lombardy, but making a more pleasing impression. A rapid grower.

PRUNUS—Flowering Cherry and Plum

There is no group of exotic trees as handsome as the flowering cherries and plums. The Purple Leaf Plum is the handsomest of all the highly colored foliaged plants in the South. The Japanese Weeping Cherry is particularly beautiful planted at the end of the walks or on the sidewalks. On page 8 you will find listed the Prunus mume, or Japanese Apricot, which is one of the earliest blooming of all the shrubs—frequently in full bloom in the coldest part of the winter.

Prunus cerasifera pissardi (Purple-leaf Plum). 10 to 20 ft. The most valuable of all purple-leaved trees. It retains its deep color throughout the warmest weather and its leaves last until midwinter. We cannot endorse it too highly. 4 to 6 ft., $1.00 each; $8.50 for 10.

P. pendula rosea (Japanese Weeping Cherry). 10 to 20 ft. In early April the pendulous branches are covered with single rose-pink flowers in clusters, and the tree is literally a mass of blossoms. The flowers appear before the leaves begin to unfold. A most desirable variety, 3-year stands. 5 to 6 ft., $3.00 each.

QUERCUS—Oak

All of our Oaks have been several times transplanted and, therefore, have a good root system. Oaks must be severely pruned when transplanted, otherwise there is danger of the tree dying. The average person considers the Oak a very slow-growing shade tree. Fortunately, this is not the case, as growth is as rapid on these trees, considering their longevity, as it is on the average shade tree.

Quercus alba (White Oak). 50 to 100 ft. A beautiful variety with spreading branches, broad, open head, and light gray bark. The foliage assumes a deep purple tint in fall. One of our finest Oaks, and very desirable for street and lawn planting.

Quercus nigra (Water Oak). 50 to 80 ft. Too well known to need description.

Quercus palustris (Pin Oak). 50 to 80 ft. Tree shapely and symmetrical. Leaves are a beautiful shade of green, in autumn turning to a brilliant scarlet. One of the most desirable trees for street and avenue planting.

Quercus phellos (Willow Oak). 50 to 80 ft. A graceful variety with narrow

SALIX—Willow

Salix babylonica (Babylon Weeping Willow). 40 ft. The well-known graceful weeping willow.

S. japonica (Japanese Weeping Willow). 20 ft. Puts out leaves about 10 days later than S. babylonica, thus protecting it from frost injury.

WE SHALL BE GLAD TO MAIL YOUR FRIENDS ONE OF OUR CATALOGS.
BROAD-LEAVED EVERGREENS A Fruitland Specialty

No Where in the South can one find such an array of Beautiful Broad-Leaved Evergreens as at Fruitland’s.

- Modern home-plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broad-leaved Evergreens. They are need for the green foliage which gives color all the year, especially in the winter when warm and color are demanded. There is need for them in all plantings, particularly in the outdoor living-room where they lay great claim to everyday beauty.

FRUITLAND NURSERIES has an unusually large collection of Broad-leaved Evergreens. The plants are frequently transplanted, carefully pruned, and given plenty of space to develop into stately, vigorous, and healthy specimens. Some varieties do not transplant successfully from open ground, and therefore these are carefully grown in pot-form, thus assuring success when removed to your home.

The figure after each name denotes ultimate height of plant.

ABELIA
Abelia grandiflora (Glossy Abelia). 6 to 8 ft. One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. Pinkish white blossoms produced all summer. For single specimens, for groups, or for a hedge. Hardy as far north as Philadelphia, and has been grown successfully in sheltered positions in Massachusetts. Even when partially killed back, young shrubs flower profusely the same season.

HEDGE PLANTS. See page 29.

ACACIA—Opopanax
Acacia farnesiana (Sweet Acacia). 20 ft. A popular Southern plant, with thorny branches and very small leaflets. The fragrant flowers, which look like yellow balls, are produced freely in February and March. A popular Northern greenhouse plant, where it blooms freely all winter. Strong, potted plants. $1.00 each.

ARABUTUS—Strawberry Tree
Arbutus unedo. 10 ft. A beautiful evergreen from Ireland, producing white bell-shaped flowers in the summer, followed in the winter by orange and red fruits that resemble strawberries.

Enjoy an out-door living room

ASPIDISTRA

AUCUBA—Gold-Dust Tree
This beautiful plant is not sufficiently appreciated. In the open ground it gives the best results if planted in a shaded situation, in somewhat moist, though rich, well-drained soil. Aucubas are especially desirable for city gardens as they are seldom injured by smoke or noxious gases. These plants are also largely used for vases, urns and window-boxes. Hardy at Washington, D. C.

Aucuba japonica (Japanese Aucuba), 8 ft. A strong-growing variety with large, dark glossy leaves.

A.Japonica variegata (Gold-Dust Tree), 8 ft. Leaves beautifully spotted with yellow. Largely used for jardinières, window-boxes, and mass planting.

NOTE—In many varieties of broad-leaved evergreens we have larger sizes than those listed in catalog. Write for prices.
AZALEAS

A group of Azalea indica (Fruitland) at the home of Mr. and Mrs. Josiah T. Clarke, Augusta, Ga.

AZALEA INDICA—Indica Azaleas

FRUITLAND NURSERIES, being at the northern limit where Indica Azaleas may be grown out of doors successfully, makes our plants much more hardy than the rapid grown Azaleas from the coast and Gulf. We quote a letter from one of our customers in northern Louisiana: "I have found Azaleas from your place to be the only ones to have come through the freeze uninjured. Please quote me on 100 Iveryana."

These beautiful shrubs are perfectly hardy in the open ground in the South, and by carefully selecting varieties a continuous supply of blooms may be had from January to May. Planted in masses of solid or well-contrasting colors, a pleasing effect is secured.

To get the best results, Azaleas should be planted in a slightly shaded location, and particular attention should be given to protecting them from the hot afternoon sun. The soil should contain an abundance of leaf-mold, peat, and sand, and should be well drained. Azaleas will not succeed in limestone soil. Mulching with decayed leaves, preferably those of hardwood trees, is a distinct advantage. If the plants are grown in pots they should be repotted after flowering and before the new growth begins; keep the plants sheltered for a few days and then plunge the pots into the open ground in a shady situation.

FRUITLAND NURSERIES' AZALEAS are more compact, giving you more flowers, making them ideal for pot culture.

Native host plants and a lack of water will subject Azaleas to attacks of red spider and tingids or lace fly. These insects usually hatch in May, and the plant should be sprayed with Black-leaf 40 at the rate of 3 teaspoonsfuls to 1 gallon water, and 2 to 3 teaspoonsfuls of soapflakes to each gallon to act as a spreader. If the plants are seriously infected, spray at intervals of ten days, but usually a spraying in May and again in September will control the pests. Be sure that the underside of the leaf is thoroughly wet with the material. Immediately after new growth begins in spring, a few leaves will have "apple" on them; these cause no material damage, but should be picked off.

Peat is a splendid mulch for Azalea-beds, as it retains the moisture. No cultivation is required, for the roots are very near the surface of the soil.

We offer several thousand Indica Azaleas in about 50 varieties, and in the sizes here indicated.

PINK AND SALMON COLORS

Croemina, tall, early, soft pink. 6-8 in. to 15-18 in.

Duc de Rohan, medium, midseason, salmon. 6-8 in. to 15-18 in.

Duke of Wellington, medium, late, salmon. 6-8 in. to 18-24 in.

George France, medium, early, pink. 6-8 in. to 2-3 ft.

Miltoni, medium, late, clear pink. 6-8 in. and 8-12 in.

Model de Marc, medium, late, clear pink. 6-8 in. and 8-12 in.

Pres. Clayes, deep salmon-pink. 6-8 in. and 8-12 in.

Salmon Pink, dwarf, very late, and hardy. 6-8 in. to 18-24 in.

Triumph de Ladeberg, late, dwarf, salmon-pink blossoms. 6-8 in. to 15-18 in.

Wm. Bull, tall, midseason, double brickdust. 6-8 in. to 2-3 ft.

RED—Including Orange-red and Deep Pinks

Brilliant, tall, late carmine. 6-8 in. to 15-18 in.

Coccinea Major, brilliant orange-red. 6-8 in. and 8-12 in.

Pride of Dorking, tall, late, cerise-red. 6-8 in. to 15-18 in.

Præstantissima, tall, midseason, deep pink. 6-8 in. to 2-3 ft.

Prince of Orange, medium, late, orange-scarlet. 6-8 in. to 18-24 in.

LAVENDER

Early Lavender, lavender, tail-growing. 6-8 in. to 18-24 in.

Formosa, tall, midseason, lilac. 6-8 in. to 3-4 ft.

Phœnicensis, medium, late, lavender. 6-8 in. to 3-4 ft.

Violacea Rubra, tall, wine-red, late. 6-8 in. to 18-21 in.

Vittata Fortunei Purpurea, tall, early, lavender, hardy. 6-8 in. to 18-24 in.

VARIEGATED

Cavendishi, late, dwarf, white with pink throat and pink markings. 8-12 in. to 18-24 in.

Criterion, dwarf, late, pink and white. 6-8 in. to 15-18 in.

Iveryana, dwarf, late, variable, pink and white, sometimes solid. 6-8 in. to 15-24 in.

Mme. Dominique Vervaine, tall, midseason, white, lavender pink throat. 6-8 in. to 18-24 in.

Mme. Margottin, medium, late, almost solid white with few pink dots. 6-8 in. to 18-24 in.

Vittata Fortunei, tall, very early, one of the hardiest and best. Colors resemble peppermint candy. 6-8 in. to 3-4 ft.

WHITE

Alba Maculata, large white flowers. 6-8 in. to 15-18 in.

Fielders White, tall, early flowering, pure white, hardy. 6-8 in. and 8-12 in.

Flag of Truce, medium, midseason, double white waved petals. 6-8 in. to 12-15 in.

Indica Alba, tall, early, and hardy. 6-8 in. to 15-18 in.

In addition to this select list of varieties, we grow in limited quantities all of the varieties which are satisfactory in this latitude, and invite requests for varieties not listed above.

AZALEA KAEMPFERI

A beautiful variety introduced by the horticultural collector, E. H. Wilson. It is very free flowering, perfectly hardy and a most desirable addition to our collection of evergreen Azaleas. We can furnish plants in shades of pink.

AZALEA KAEMPFERI HYBRIDS

We have been trying to get a hardy type of tall growing Azaleas, combining the colors of the Indica type with the hardness of the Kaempferi type. In this we seem to have succeeded. These hybrids came through the severe winter 1935-36 when the temperature dropped to 7°F. above zero, with only slight injury to one-year-old plants—none to older plants. These hybrids are in all shades of pink, red, salmon and lavender, flowering at the same time as Kurume type. We offer this season several thousands of these hybrids in mixed colors only. As all Azaleas may be safely transplanted while in bloom, we can send you any of the hybrids as to color.

Above two Kaempferi: Each 10

2 to 3 ft. ................................ $2.00 17.50
18 to 24 in. ............................... 1.50 12.50
13 to 18 in. ............................... 1.00 8.50
12 to 15 in. ............................... 0.75 6.00
10 to 12 in. ............................... 0.50 4.00

AZALEA KURUME—Obtusum Japonicum

The parent plant of these charming, handsome, hardy Azaleas came from the sacred Mount Kirishima in Japan. They have been cultivated for about 100 years in the city of Kurume, on the Island of Kyushu in Japan, but it has been only for a few years that we, in America, have had the pleasure of knowing these exquisite flowers. Height, 3 ft.

A. amoena. Small, bronzy foliage hose-in-hole, claret flowers. 6 to 8 in. to 18 to 24 in.

Bridesmaid. Glowing salmon flowers produced in large clusters; very prominent stamens. Small, glossy green foliage. 6 to 8 in. to 15 to 18 in.

Christmas Cheer. Hose-in-hole; crimson. Midseason. 6 to 8 in. to 10 to 12 in.

Coral Bells. Hose-in-hole; pink. Early. 6 to 8 in. to 10 to 12 in.

Daybreak. Pure light pink flowers in dense clusters; very free-flowering. Beautiful green foliage. 6 to 8 in. to 15 to 18 in.

Flame. Brilliant red, with coppery suffusion; beautiful, medium-sized flowers. Glossy foliage. 6 to 8 in. to 18 to 24 in.

Hinodegiri. Single; red. Late. 6 to 8 in. to 10 to 12 in. to 12 to 15 in.

Hinomayo. Single; salmon; larger flowers than the others. Said to be not a true Kurume; midseason. 6 to 8 in. to 15 to 18 in.

Orange Beauty. Midseason. Large, single; free flowering. Foliage light green. 6 to 8 in. to 12 to 18 in.

Pink Pearl. Hose-in-hole; delicate apple-blossom-pink. Late. 6 to 8 in. to 15 to 18 in.

Salmon Queen. Lovely shade of salmon-pink, with large individual flowers. Hose-in-hole type. Light green foliage. 6 to 8 in. to 10 to 12 in.

Snow (Swan). Hose-in-hole; white. Mid-season. 6 to 8 in. to 10 to 12 in.

Sunstar. Single, medium-size red blooms. Rather open-growing. 6-8 in to 15-18 in.

All Kurume Azaleas: Each 10

15 to 18 in. ................................ $2.00 $17.50
10 to 12 in. ................................ 1.50 12.50
8 to 10 in. ................................ .75 6.50
6 to 8 in. ................................ .50 4.50

BERBERIS—Barberry

Berberis atrocarpa. 6 ft. A very handsome, densely branched plant, having dark green leaves and bright yellow flowers in March. Introduced from western China by the late E. H. Wilson. Each 10

18 to 24 in. ................................ $1.75 $15.00
15 to 18 in. ................................ 1.25 10.00
12 to 15 in. ................................ .75 6.50
10 to 12 in. ................................ .50 4.50

B. prunosa. 6 ft. Vigorous growing shrub with long spiny foliage, and conspicuous berries covered with a whitish bloom. Each 10

30 to 36 in. ................................ $3.00
24 to 30 in. ................................ 2.50
18 to 24 in. ................................ 1.75
15 to 18 in. ................................ 1.25 $10.00
12 to 15 in. ................................ .75 6.50

B. potanini. A very beautiful low-growing barberry, with margins of leaves circled. During the winter the leaves take on a purple tint.

B. triacanthophora (Threespringe Barberry). An unusual type from China, having narrow-toothed leaves. Very graceful.

Above two varieties: Each 10

12-15 in. ................................ $1.75
10-12 in. ................................ .50

BUXUS—Box

Buxus harlandii (Chinese Box). A rapid growing new Boxwood which will grow satisfactorily where the other Box will not. Probably not as hardy as the English Boxwood. Each 10

8 to 10 in. ................................ $3.00 $25.00
6 to 8 in. ................................ .25 2.00 17.50

B. sempervirens sulphurea (Truedwarf Box). We have a nice lot of these popular plants in sizes suitable for boxes, urns and hedges. Each 10

24 to 30 in. ................................ $3.00
18 to 24 in. ................................ 2.50
10 to 12 in, compact ........................ 1.25 $10.00
8 to 10 in, compact ........................ .85 7.50
8 to 6 in, compact ........................ .50 5.00

See page 29 for these plants in edging grade.

PLANTING EVERGREENS

Plants dug with a ball of earth wrapped in burlap is in nursery parlance “B&B”. After the plant is set in the hole where it is to remain, the string should be cut and the burlap loosened—it is not necessary to remove burlap from the hole. Plants dug B&B in heavy soil and transplanted to light soil frequently dry out until, when planting, the ball of earth is pierced several times with a sharp instrument to allow water to penetrate.

Preparing the soil properly will give the best results. Dig holes of ample size. Place a layer of rich top soil mixed with compost in the bottom of the hole, set plant at proper depth, and fill hole half full with earth. At this point pour in water freely, but do not wash soil from roots. Allow water to settle, put in more soil and firm it about the roots; then fill up the hole. Place a mulch of well-rotted leaves to depth of from two to four inches about the plants for protection in winter and summer.

IN ADDITION TO OUR NURSERY PRODUCTS, WE CARRY A COMPLETE LINE OF SPRAYING MATERIALS AND SUPPLIES.
Camellia Japonica and Sasanqua
from the FRUITLAND Collection

In 1856 when Fruitland Nurseries was founded our grandparents were then planting our Camellias. However, they called these plants "Japonicas." Eighty years later Fruitland's Camellias are still being planted. In the past the more formal or double imbricated varieties were extensively planted. Today there are hundreds of varieties. The graceful single varieties do well in colder localities; the gigantic semi-doubles, the tremendous peony-type, as well as the formal old fashioned double types flower in such a variety of color as to thrill the most sophisticated horticulturist.

The Camellia Sasanqua varieties and Camellia Japonica Daikagura start flowering in early fall before frost, followed by the other varieties of Camellia Japonica from December until March. Even after flowering Camellias make one of the most handsome of all evergreen shrubs. Wherever Camellias can be grown out of doors, by all means plant as many as you can successfully care for. Whether or not they have a definite value as an investment. No doubt in your own neighborhood large Camellia plants have been sold for hundreds of dollars to wealthy collectors.

Should you be out of the limit of outdoor culture of Camellias, a small greenhouse may be cheaply constructed, or even a deep cold frame where Camellias may be potted and placed inside in winter. Camellias will stand a lower temperature without injury to the flowerbuds than almost any other winter flowering plant.

CULTURE OF CAMELLIA JAPONICA

Camellias will grow in full sun if protected for the first few summers with a lattice frame. However, an ideal place for planting is where the plants get only a half day's sun. Do not plant in full shade, as they will not blossom as freely. In planting, the holes should be dug large. If the soil is not fertile, use the following mixture: one-half good garden soil; one-fourth well-rotted cow manure; one-fourth peat or leaf-mold, well mixed. After planting, mulch with half-rotted leaves or peat. Each spring Camellias should be fertilized with well-rotted cow manure, bone-meal and Vigoro or Loma. Always keep the plants well mulched and watered. The first two summers after planting are very trying on the plants and often prove disastrous unless these two simple things are done: watering and mulching.

The foliage is sometimes attacked by a scale-insect, which may be readily controlled by spraying with Garden Volek—1 part to 50 parts of water. In spraying be sure to wet the underside of leaves. This spray material may be found on page 43 of our catalogue.

GROUP NO. 1

Alba Plena. Double imbricated white. Early. 8-12 in. to 15-18 in.
Candida Elegantissima (Countess Lavinia Maggi; Mikenjak; Lady Audrey Buller). The large foliage is lustrous dark green. Very large semi-double red and white blossoms. 8-12 in. and 12-15 in.
Candidissima. Double imbricated white. Late. 8-12 in. and 12-15 in.
Chandleri Elegant (Pride of the Emperor's Garden). Semi-double deep pink and white; loose peony center. On large plants of this variety one will have solid deep pink blossoms. On some blossoms pink will predominate—others white. The formation of the blossoms vary to a great degree also. 8-12 in. to 18-24 in.
Cliviana. Peony-form, solid pink. 8-12 in. to 24-30 in.
Comte de Comer. Double imbricated white with pink stripes, occasionally blush-pink. Exceptionally beautiful in mild climates and for greenhouse culture. 8-12 in. to 18-24 in.
Concordia (Beautiful; Prince Albert). Loose peony, pink and white, and a wide variation of color combinations. Rapid pyramidal growth. 8-12 in. to 3-4 ft.
Cup of Beauty (Tasse de Beau). Semi-double. As blooms begin to open the outside petals with the very tight center bud resemble a cup and saucer. This center bud opens later, showing quantities of stamens. Compact grower. 8-12 in. to 15-18 in.
Enrico Bettoni (Laternarius). The Sarah Frost of the west coast. Semi-double. Translucent pink, yellow stamens interspersed among the heavy petalage. Rapid growth. Does not blossom while small, but is very floriferous as plant grows older. 30-36 in. to 3-4 ft.
Feasti (Blushing Bride). Double imbricated white with pink markings. Often solid pink. Fine variety for the greenhouse, where its full beauty will be brought out. 8-12 in. to 3-4 ft.
Frau Minna Seidel (Pink Perfection; Hako-Tsuru). Double imbricated shell pink; compact; very floriferous. 8-12 in. to 24-30 in.
General Washington. Semi-double white with occasional deep pink dots or markings. White always predominates. 8-12 in. and 12-15 in.
Harlequin. Double imbricated and peony-form may be found on large plants of this variety. Pink and white variegated to solid colors. Another wonderful greenhouse variety. Very late. 8-12 in. to 3-4 ft.

Camellia japonica, Herme

Herme (Hikari Gengi; Jordan's Pride; Jenny Lind; Souv. de Henri Gouchard). Pink and white. Described by some as a "Popular old variety" and others as a "Popular modernistic flower". Semi-double. Blossoms slightly fragrant. A favorite with all who know it. 8-12 in. to 18-24 in.

SOME OF OUR CAMELLIA JAPONICA BLOSSOMS ARE SHOWN IN COLOR ON BACK COVER PAGE OF THIS CATALOG.
Group No. 1—Continued

Imbricata Rubraplena (Prince Eugene Napoleon; Pope Pius IX; Floreplana Atrorubens; Carlotta Grisi; Madame Lebois). Double imbricated. This much-named deep carmine Camellia makes long growth. For this reason it is most desirable for cutting. The blossoms remain fresh longer than most any variety. 8-12 in. to 30-36 in.

Imperator. The brilliant Christmas-red, peony-type blossoms, which are more graceful than some of the other peony-types, make this a most beautiful variety. 8-12 in. and 12-15 in. Limited stock of 30-36 in.

Latifolia (Leana Superba; Gloire de Nantes; Superbissima; Fanny Bolis). Handsome foliage. Blossoms quite large; semi-double; bright red, occasionally blotched white; conspicuous stamens. Late. 8-12 in. to 3-4 ft.

Madame Stirekoff (Duc de Orleans; Gen. Lamariciere; Punctata Major). Semi-double pink and white—often solid pink. This plant has exceptional merits for out-door flowering. 8-12 in. to 24-30 in.

Monarch (Gumelli; Honeur d‘Amerique; Red Ball). Peoniform, deep pink, often spotted white. One of the most handsome of the late Camellias. Blossoms often measure 6 in. across. 8-12 in. to 30-36 in.

Neige d‘Oree. Double imbricated, white with slight yellow shading to center. Its beauty is brought out in a greenhouse. 8-12 in. to 18-24 in.

Pompenia Rubra. Peoniform, red, known as Christmas Glory or Carnation. 8-12 in. to 15-18 in.

Speciosa (Giante de Batailles), Peoniform, crimson and white. This Camellia is a Prof. Sargent variety.

Stiles Perfection. Peoniform, pink and white. 8-12 in. to 3-4 ft.

Stiles Perfection Pink. Pink sport of the above. 8-12 in. to 24-30 in.

Sweeti Vera (Lewelling Variegated). Exquisite; large; semi-double white with markings of delicate pink. Occasionally sports a solid delicate pink blossom. This variety should be in every collection of Camellias. 8-12 in. and 12-15 in.

Tricolor Sieboldi. Wakanoura var.) Illustrated in color on front cover. Semi-double variegated pink, red, white, in combination and oftentimes solid colored. A most changeable variety. The pure white sport of this variety is known as Leucantha. Handsome green foliage. Will bloom outdoors when and where other varieties fail. 8-12 in to 24-30 in.

Tricolor Sieboldi Red. (Wakanoura Red). Solid red sport of above. 8-12 in. to 24-30 in.

Variabilis (Horkan; Rena Campbell). Semi-double to peoniform. Pink and white in combination and solid colors. Pyramidal rapid growth. Blossoms late. Well worth having in a collection. 8-12 in. to 3-4 ft.

8 to 12 in. .50 5.50

MAGNOLIA GARDEN VARIETIES
Derbyana (Floreplena Peonyflora). Semi-double to peoniform, deep pink or red. 8-12 in. to 30-36 in.
Gigantea. (Magnolia King; Kellingtonia). Semi-double red and white. 8-12 in. and 12-15 in.
Grandiflora Superba (Alba Superba; Niveus). Semi-double white, conspicuous yellow stamens. Known also as Rev. John Grinke Drayton, which is a semi-double rose-pink. 8-12 in. and 12-15 in.
H. A. Downing. (Helen of Troy). Semi-double bright red. Late. 8-12 in. 15-18 in. and 18-24 in.
Marchioness of Exeter. Peoniform, light pink and white. Ofttimes solid pink. 8-12 in. to 24-30 in.
Sara C. Hastie (Debutante). Peoniform, delicate pale pink. Early. Desirable. 8-12 in. to 24-30 in.
Wm. S. Hastie (Mathotiana Rubra; Princess Louise; Purp. Prince; Purple Emperor). Large imbricated as it first opens, opening to semi-double red. 8-12 in. to 18-24 in.

PRICES OF ABOVE VARIETIES:
24-30 in. $6.00
18-24 in. 4.00
15-18 in. 3.50
12-15 in. 3.00
10-12 in. 2.50
8-12 in. 2.00

A GROUP OF UNUSUAL VARIETIES
Alba Fimbriata. Double white; outside of petals serrate. 8-12 in. and 12-15 in.
Apple Blossom. Single. Apple blossom odor and coloring. 8-12 in. and 12-15 in.
Daikagura. Semi-double deep pink. Begins blooming in late fall. 8-12 in. to 18-24 in.
Kumasaka (Lady Marian). Formation of flower similar to Herme, but a solid deep pink. 8-12 in. and 12-15 in.
Lady Humes Blush. Very rare is this true double imbricated white, suffused with pink. Also known as Buff, Incarnata and Ella Drayton. 8-12 in. to 15-18 in.

Above five varieties:
Each 10
18 to 24 in. $4.00
15 to 18 in. 3.00
12 to 15 in. 2.00
8 to 12 in. 1.50

FRUITLAND CAMELLIA JAPONICA COLLECTION No. 4

CAMELLIA JAPANICA

CAMELLIA SASANQUA

This Japanese species is one of our most handsome fall-blooming evergreens. Foliage rather smaller than C. japonica, and the plant is of more rapid growth. Blossoms here in October and November. 10 ft.

CINNAMON—Camphor Tree

CINNAMOMUM CAMPHORA. 40 ft. A native to China and Japan. Hardy in the far South where it makes a sizeable tree. At Augusta it frequently freezes to the ground, but will come out and make rapid growth in one season. Each Extra strong from pots. $1.00 Strong plants from pots. 50

CLEVERA

CLEVERA OCHNACEA (C. japonica). 20 ft. A slow-growing plant related to the Camellias and requiring the same treatment. New foliage reddish, turning a glossy green. Small, delightfully fragrant, creamy white blossoms in June, followed by showy red fruits which are retained all winter. One of the best evergreens, and all too little used. Native to Japan.

Above five varieties:
Each 10
4 to 5 ft. $5.00
3 to 4 ft. 3.00
2 to 3 ft. 2.00
12 to 18 in. 1.50
12 to 18 in. 1.00

Camellia Japonica (Enrico Beltoni)
COTONEASTER

Cotoneaster franchetti. 6 ft. Evergreen in South, but not hardy in North. Pinkish flowers in clusters, followed by orange-red fruit, which is retained all winter.

C. horizontalis (Rockspray; Prostrate Cotoneaster). 3 ft. A most satisfactory spreading plant suitable for terraces, walls, and rock-gardens. Pink blossoms, followed by brilliant red fruits throughout the winter.

C. microphylla. 3 ft. A low-growing prostrate shrub; dark green, oval leaves. Bright red fruit.

Above three varieties: Each 10
24 to 30 in. $1.00 $9.00
18 to 24 in. .75 6.50

ELEAGNUS—Japan Oleaster

Elaeagnus pungens. 10 to 15 ft. Leaves 2 to 4 inches long, very dark green above, silvery beneath; margin of leaf undulating. Creamy white, fragrant flowers produced in November. A beautiful shrub.

E. pungens—Fruitlandi. 10 to 15 ft. A variety originated at our Nursery. Evidently a cross of E. macrophylla and E. pungens simoni. Leaves large, pointed, beautiful silvery beneath. This is a very fine addition to our broad-leaved evergreens.

E. pungens reflexa (Climbing Elaeagnus). 10 to 15 ft. Will climb to top of fences and unsightly trees, making a dense screen. Birds delight to nest in these plants. Fragrant blossoms in November, followed in March by edible red fruits.

E. pungens simoni (Simon’s Oleaster). 10 to 15 ft. Foliage elongated, silvery on under side. Plant compact in growth. Fragrant blossoms in November, followed in March by edible red fruit.

All above Elaeagnus:

EURYA

All Euryas delight in a partially shaded location.

Eurya emarginata. From Japan. Has obovate emarginate leaves and axillary paired flowers, followed by black berries about an eighth of an inch in diameter.

E. japonica. Dwarf compact shrub. Producing in early spring, small, fragrant, creamy white flowers on the underside of the stems.

E. ochracea. From Japan. A shrub or small tree with leaves 3 to 5 inches long and usually solitary; nodding white flowers an inch across, followed by berry-like black fruits ¼ inch in diameter.

GARDENIA—Cape Jasmine

Very popular evergreen shrub with bright, glossy foliage. Hardy as far north as Virginia and Tennessee. They do well in almost any well-drained soil. Large, fragrant, white flowers are freely produced from middle of May until fall.

Gardenia florida. 6 ft. Very large, white, fragrant flowers in middle of May. Foliage glossy.

G. fortunei (Fortune Cape Jasmine). 6 ft. Flowers larger than those of G. florida.

All Gardenias:

YOUR PATRONAGE IS APPRECIATED AT FRUITLAND. WE PLAY NO FAVORITES.
HESPERALOE

Hesperaloe parviflora. 2 ft. The so-called "Red Yucca." A native of Texas; hardy in the southeastern states. Rosy-red flowers on top of stems 3 to 4 ft. tall. Begin flowering in May. Each 2-yr. $1.50

ILEX—Holly

"Again at Christmas did we weave
The Holly round the Christmas Hearth."

All of our Hollies are grown from either cuttings or grafts from well-berried specimens, insuring handsome plants for you.

We find the Holly one of the most cosmopolitan of plants, being distributed over North America, Africa, Asia, Europe and South America.

Ilex aquifolium (English Holly). 40 ft. This variety is good only near the coast where there is ample moisture. Berries red. Each 2 to 3 ft. $3.00 18 to 24 in. 2.50

I. cassine angustifolia. 20 ft. A narrow leaf native Holly having quantities of small red berries in the winter. Ideal for hedges. See page 29 for hedge plants. Each 6 to 8 ft. $5.00 5 to 6 ft. 4.00 4 to 5 ft. 3.00 3 to 4 ft. 2.00

I. cassine myrtifolia (Myrtle-leaf Holly). 10 ft. Very small dark green leaves. Rather large, bright red berries freely produced. Ideal for planting in bogs or where too wet for other plants to grow.

I. myrtifolia lowii. Same as above but with yellow berries.

Above two Hollies: Each 10
2 to 3 ft. $1.25 18 to 24 in. 75

I. cornuta (Horned Holly). 12 ft. A Chinese species discovered the middle of last century by the late Robert Fortune. Leaves shining green; usually with five sharp spines. Growth compact and pyramidal. Fruit or berries are the largest of any Holly in cultivation.

I. cornuta burfordi (Burford's Holly). 15 ft. A variety of the above, with few or no spines. Of more rapid growth than the above type.

Above two Hollies: Each 10
4 to 5 ft. 5.00 3 to 4 ft. 4.00 2 to 3 ft. 3.00 18 to 24 in. 2.50

18 to 24 in., very bushy $2.00 15 to 18 in., very bushy 1.50 12 to 15 in., very bushy 1.00 10 to 12 in. .75

I. integra (Othera japonica). 20 ft. This Japanese species is the most distinct of the Hollies, having light green, oval, spineless leaves. Red berries produced on large plants. Each 3 to 4 ft. $3.00 2 to 3 ft. 2.50

I. latifolia (Tarao or Magnolia-leafed Holly). 25 ft. This is the largest folaged of any Holly, having leaves as large and as lustrous as the Southern Magnolia, growing in the Southern part of Japan to trees 50 to 60 feet tall. In cultivation it will perhaps reach half this height. Very rare.

Each 3 to 4 ft. $5.00 2 to 3 ft. 4.00 18 to 24 in. 2.00 12 to 18 in. 1.50

Above two varieties: Each 10
5 to 6 ft., specimens $8.00 4 to 5 ft., specimens 5.00 3 to 4 ft. 3.00 2 to 3 ft. 2.00 18 to 24 in. 1.00

I. opaca xanthocarpa (Yellow-berried variety). Each
3 to 4 ft. $2.50 2 to 3 ft. 2.00 12 to 18 in. $1.50

I. pedunculosa. An oriental species, growing in Japan and China to small trees. In cultivation it will probably grow to 10 or 15 ft. Narrow light green leaves to 4 inches long, with red berries.

I. pernyi. A miniature Ilex cornuta. Small, very spiny. Dark green foliage; large red berries. Very slow growth. Among first plants discovered in China by Father Paul Pery, who penetrated the then unknown country disguised as a Chinese beggar.

I. pernyi veitchii. A more rapid growing, larger foliaged variety of the above. Originating as a seedling of Ilex pernyi in the famous Veitch's Nursery in England.

I. purpurea (Oldhami). One of the most handsome of the exotic Hollies growing to about 20 ft., making compact pyramidal growth. Lustrous dark green foliage, with quantities of red berries.

Above four varieties: Each
Small plants $1.00

I. vomitoria (Yaupon). 20 ft. A native shrub with spreading branches and small, oval or oblong leaves. Most effective when planted in clumps. Small red berries freely produced. Ideal for hedges.

Each 10
6 to 8 ft. $5.50 5 to 6 ft. 4.50 4 to 5 ft. 3.50 3 to 4 ft. 3.00 2 to 3 ft. 2.00 18 to 24 in. 1.00

ILLICIIUM—Anise Tree

Ilicium anisatum (Japanese Anise Tree). 15 ft. A handsome evergreen with broad, light green leaves which, when bruised, emit an anise fragrance. Very desirable.

Each 10
4 to 5 ft. $3.00 3 to 4 ft. 2.00 2 to 3 ft. 1.50 18 to 24 in. 1.00

KALMIA—American Laurel

Kalmia latifolia (Mountain Laurel). 10 to 12 ft. A beautiful, native broad-leaved evergreen shrub, often attaining the size of a small tree. Its thick, waxy leaves are retained the year round, giving a striking effect. The pink and white geometrically shaped buds appear and expand into beautiful white and flesh-colored flower cups. Of greatest value for massing, making a handsome effect in the landscape. All from open ground. Each 10
18 to 24 in., extra-strong clumps $2.00
12 to 18 in., extra-strong clumps 1.50

See page 29 for hedge plants.

L. officinalis (English Cherry-Laurel). 20 ft. The principal merits are great vigor and beautiful, broad, shining foliage, easy cultivation, thriving in any ordinary, good, well-drained garden soil. Not hardy north of Washington, D.C. The plants do not bloom until they are several years old, when they produce spikes of small white flowers. For massing or for single specimens, few plants possess more advantages than the English Laurel.

LAVANDULA—Lavender
Lavandula. The true Sweet Lavender, growing about 18 in. high and having fragrant blue flowers in July and August. 25c each; $2.00 per 10.

LIGUSTRUM—Privet
PLEASE NOTE that heretofore Ligustrum japonicum and Ligustrum lucidum have been incorrectly named. That which was called Japonicum is really Lucidum, and that called Lucidum is Japonicum. The Lucidum is tall growing, and the Japonicum is low growing.

FRUITLAND NURSERIES is happy that they were the first nursery in America to correct this error. Ligustrums are a group of plants which are indispensable to Southern plantings.

Ligustrum japonicum (Japanese Privet). 15 ft. A beautiful form of Japanese Privet. Leaves large, thick, ovate, lanceolate, of a very dark shining green. Large heads of white flowers produced in May, followed by dark purple berries, which are retained throughout the winter. Hardy at Baltimore. A most desirable variety.

MAGNOLIA
Magnolia grandiflora (Southern Magnolia). 50 ft. The grandest of all our native broad-leaved evergreen trees. It is a native of the middle sections of the Southern States, and succeeds best in a rich soil. Nothing more conspicuous can be seen among evergreens when its large, white flowers are fully expanded. Their period of blooming begins in the middle of April and lasts until August. Hardy at Philadelphia.

MAHONIA—Holly Grape
Mahonia bealei (Leatherleaf Holly Grape). 6 ft. A Japanese Barberry. Leaves very broad, with five pairs of leaflets. Flowers yellow, in long spikes, during the first three months of the year, followed by dark purple berries. A magnificent evergreen. This splendid plant thrives in almost any situation, but does best in a partially shaded location, where the ground is well drained. Hardy at New York in protected situations.

MICHELIA—Banana Shrub
Michelia fuscata (Magnolia fuscata; Banana Shrub). 20 ft. In the South one of our most popular and desirable evergreen shrubs. From early April until June the plant produces a quantity of yellowish white flowers, edged with maroon. The banana-like fragrance is so pronounced that it is recognized several yards from the plant. A desirable conservatory shrub in the North.

NANDINA—Heavenly Bamboo
Nandina domestica. 10 ft. In China this is considered one of their favorite plants, and justly so. It is extremely decorative all the year. In the spring and autumn the large compound leaves are tinged with red; in early summer the large panicles of white flowers; and in the winter, the crowning glory, terminal spikes of large bright red berries which are retained until the following spring. Hardy to Washington and on Long Island. This is a FRUITLAND NURSERIES SPECIALTY.

NERIUM—Oleander

All Neriums are practically hardy in this latitude. They are also successfully grown along the coast of southern New Jersey, but should be protected during winter. They commence to bloom the last of April and bloom throughout the summer. The Oleander is a most desirable plant for growing in tubs in conservatories. Height 15 ft.

Mme. Peyre. Very double; triple corolla; pale flesh.

Prof. Parlarre. Pink; double corolla; very fine.

Single White. Strong grower; continuous bloomer.

Double Dark Red.

Double Yellow.

Nerium

OSMANTHUS—Olive
Osmanthus aquifolium. 25-30 ft. A most beautiful evergreen shrub, with dark green, spiny-toothed leaves, resembling the Holly. Fragrant white flowers produced in fall.

O. fortunei (Fortune Olive; Holly-leaf Tea Olive). 25 ft. A strikingly beautiful shrub with dark green, spiny-toothed leaves resembling the holly. In fall the plant is covered with deliciously fragrant white flowers. Without doubt this is one of the most desirable broad-leaved evergreens. Does well in most any situation, but will give best results when planted in rich soil and in partial shade.

PITTOSPORUM

Pittosporum tobira (Tobira Pittosporum). 10 ft. A fine, compact-growing shrub with dark green leaves clustered at the ends of the branches. Flowers yellowish-white, very fragrant, produced the middle of April and last a long time. A splendid shrub for specimens or massing, and can be trimmed in fanciful shapes.

LET US MAKE SUGGESTIONS FOR YOUR PLANTING THIS SEASON.
PYRACANTHA—Fire Thorn

Pyracantha, 75 ft. to 10 ft. A fine perennial shrub, thriving in almost any soil. Vigorous, hardy, and nearly spineless. In the autumn, it bears large clusters of yellow berries, which contrast admirably with the glossy, dark green foliage. Probably tender north of southern Ohio.

P. g forskoli. 12 to 14 ft. Same as above, except fruit is red.

P. formosana (Koidzumi), 6 ft. Compact and fast grower. Small leaves and large red berries.

P. coccinea island (Lalain Fire Thorn), 15 ft. A beautiful sub-variety of evergreen Burning Bush. Covered with a profusion of white flowers in early spring. Followed by bright orange berries, which hang on all winter. May be trained against walls, buildings, and even arched gateways, making a pleasing effect.

P. crenulata kansuensis. A small evergreen shrub, with fine foliage and orange-colored berries of attractive appearance. Somewhat prostrate.

P. gibbsii yunnanensis, 6 ft. A beautiful variety of a spreading, dwarf habit. During the winter the plants are literally a mass of bright red berries. Shining green leaves.

Above Pyracanthas:

RUSCUS—Butcher's Broom

Ruscus aculeatus. 3 ft. A unique, dwarf evergreen shrub from England, with acute or spiny, bract-like leaves 1/2 to 1 1/2 inches long. Produces numerous red berries which are retained during winter. Strong plants. $1 each.

SANTOLINA—Lavender Cotton

Santolina incarna (Chamaecyparissus). A lovely gray-folaged aromatic herb or small shrub. Desirable for a low hedge to border beds or walks when it is too hot to grow Boxwood. It will stand hard shearing.

FRUITLAND Nurseries Grow Beautiful Conifers

Here at Augusta we have some of the most beautiful coniferous evergreens to be found. Wonderful soil, ideal climate, and expert growers make FRUITLAND conifers the best for you.

- Everyday in the year Evergreens have an important place in the landscape picture. In summer, the foliage enlivens the color of shade trees and shrubs; in winter, when days are dull and gardens sleeping, the Evergreens show their forms and color-tones in a most appealing fashion, and when the new growth breaks in spring we know that King Winter has retreated and that the "Time of the singing of birds" is at hand.

To keep Coniferous Evergreens beautiful through the years, they should be fertilized annually. The best season is in March, just before the new growth begins. Well-rotted manure is the best fertilizer to use. If this is not to be had, sheep-manure and bonemeal are very satisfactory. Keep the soil loosened. If plants are in beds, these beds should be worked up at least six inches from the outside of the branches. If specimen plants, make a circle at least 12 inches outside branches of plant. Keep this free from weeds and grass.

Practically all conifers may be pruned, and thus kept shapely. The only species not usually pruned are Pinus and Cephalotaxus. Shearing may be done not later than May and June, as growth is slow on certain varieties, and plant would be too formal and stiff during the winter if pruned later.

Very little spraying is necessary for Coniferous Evergreens—usually two sprayings of 16 tablespoonfuls of Bordeaux Mixture and two teaspoonfuls of Black-Lead 40 to each gallon of water will control the fungous and insect disease of these plants—one spraying in May or June and another in July or August.

The figure after each name denotes ultimate height of plant.

ARBORVITAE. See Thuja.
BIOTA. See Thuja.

How to Properly Plant Evergreens

1. DIG HOLE AT LEAST A FOOT LARGER AND DEEPER THAN EARTH ATTACHED TO TREE. COMPLETELY SURROUND ROOT OR BALL OF EARTH WITH RICH LOAMY TOP SOIL.

2. PLACE TREE IN HOLE SLIGHTLY DEEPER THAN TOP OF BALL OF EARTH.

3. PACK TOP SOIL AND FEET OR FILLING HOLE WITH WATER.

4. CUT OFF BURLAP ON TOP OR ROLL IT BACK.

5. ADD LOOSE SOIL UNTIL THE HOLE IS FILLED AND PACK FIRMLY AND LEAVE LIBERAL SUPPLY OF LOOSE EARTH ON TOP.

CEDRUS—Deodar Cedar

Cedrus deodara. 50 ft. The Great Cedar of the Himalayan Mountains. A stately tree with glaucous green foliage and feathery spreading branches. Perfectly adapted to this climate.

Each
3 to 4 ft. $2.00
2 to 3 ft. 1.50
18 to 24 in. 1.00

A block of Cedrus deodara and other conifers

CEPHALOTAXUS—Plum-Yew

Cephalotaxus drupacea (Japanese Yew). Dwarf-growing, almost trailing in habit. Excellent for rockeries and ground covering, or where a low spreading effect is desired.

Each
18 to 24 in. $2.00
15 to 18 in. 1.50
12 to 15 in. 1.00

C. harringtonia (C. pedunculata), 10 to 15 ft. Medium-sized tree of compact and rather bushy habit. Leaves from 1 to 2 inches long, dark glossy green. A beautiful variety.

C. harringtonia fastigiata (Spiral or Korean Plum-Yew), 8 ft. Upright growing variety of bushy habit, with narrow, dark glossy foliage. Very hardy. This closely resembles the Irish Yew.

Above two Yews:

Each
18 to 24 in. $1.50
15 to 18 in. 1.00
12 to 15 in. 75

NOTE—We can supply many of the conifers in larger sizes. Write for prices.

CHAMAECYPARIS—Retinospora (Japan Cypress)

Chamaecyparis lawsoniana (Cupressus lawsoniana). Lawson Cypress from California and Oregon, where they are timber trees to 100 ft. In cultivation they usually are about 10 to 20 ft. Valuable, as they thrive in moist shady locations where so few conifers will grow. Should not be planted in dry hot locations. FRUITLAND NURSERIES has four distinct and beautiful varieties which we have selected as being the best for the South.

Each
6 to 8 ft. $6.50
5 to 6 ft. 5.00
4 to 5 ft. 4.00
CHAMAECYPARIS
Retinospora—Continued
C. lawsoniana alumi (Blue Lawson Cypress). 12 ft. Foliate beautiful metallic silvery blue color. Branchlets flattened and very close together. A symmetrical tree, well adapted for use on the coast.
Each
18 to 24 in. $1.00
15 to 18 in. 75

C. obtusa nana (Dwarf Hinoki Cypress). 6 ft. Somewhat irregular in outline this dwarf form of Chamaecyparis relieves the monotony of more formal conifers. The foliage is a rich dark green, holding its color during the entire year. In growth the tree is compact and is numbered among the best of the dwarf types. Japanese gardeners use this variety for training and pruning into novel and grotesque forms.
Each 10
2 to 3 ft. $3.00 $27.50
18 to 24 in. 2.50 22.50
C. pisifera squarrosa veitchi. 40 ft. Veitch's Silver Cypress. Foliate of a soft textural, richly glaucous blue.
Each 10
5 to 6 ft. $1.00 $35.00
4 to 5 ft. 3.00 27.50
3 to 4 ft. 2.00 17.50
CRYPTOMERIA—Japan Cedar
Cryptomeria japonica. 100 ft. A native to Japan where it is much planted and used for timber. Easily grown and hardy to Washington, D. C. A graceful and rapid grower. Foliate somewhat resembles the Norfolk Island Pine.
Each
8 to 10 ft. $10.00
6 to 8 ft. 8.00
CUNNINGHAMIA
Cunninghamia sinensis (Chinese Fir). 80 ft. A unique and beautiful Chinese tree, where it is used for timber and much planted around temples and shrines. Leaves spirally arranged on horizontal branches; a charming shade of emerald green, becoming bronzy in winter.
Each
3 to 4 ft. $4.00
2 to 3 ft. 2.00
CUPRESSUS—Cypress
Cupressus sempervirens pyramidalis (Columnar Italian Cypress). 60 ft. This well-known and popular conifer is most desirable where a formal effect is required. It is compact and shaft-like in habit. Always plant in a dry, sunny location, as it will not stand excessive moisture.
Each
14 to 16 ft. $25.00
12 to 14 ft. 20.00
4 to 5 ft. 4.00
3 to 4 ft. 3.00
2 to 3 ft. 2.00
JUNIPERUS—Juniper
A most worthwhile and attractive genus of evergreens. In habit of growth they vary from prostrate creeping shrubs to tall pyramidal trees, varying in foliage coloring from bright green to glaucous blue and bronze gold. There is about forty species and innumerable varieties distributed from the arctic zone to the tropical mountains.

Your home landscape is a permanent fixture like your house and lot. It is important to do the initial planting right—and it is where we can help if you consult us.

SPREADING OR TRAILING VARIETIES
Here belong the most widely planted varieties, being used in foundation planting and in rock gardens and terraces.

Juniperus chinensis pfitzeriana (Pfitzer's Juniper). 6 ft. This is the most widely planted of the spreading Junipers. Wide spreading branches pendent at ends. Foliate a constant grayish-green. 18 to 24 in. and 15 to 18 in. only.
J. communis depressa, 4 ft. Low spreading compact variety, with bluish-green foliage.
J. communis depressa aurea, 4 ft. Similar to the above, but with young growth tinged a brassy golden. Not satisfactory on sandy soils.
J. sabina tamariscifolia (Spanish Savín). 2 ft. A dwarf trailing form of great merit. Ideal for rock gardens and terraces.
J. squamata (Scaly Juniper). 3 ft. A very prostrate trailing Juniper from Asia, having pleasing glaucous green foliage. Good for rock garden and sandy soil. The true type like FRUITLAND has is difficult to procure.
J. virginiana tripartita. Low densely-branched, spreading variety of irregular growth. 2-3 ft. and 3-4 ft. only.
All spreading Junipers:
3 to 4 ft. Each
spread . . . . 4.00 37.50
2 to 3 ft. spread . . . 2.50 22.50
18 to 24 in. spread . . . . 1.50 12.50
15 to 18 in. spread . . . . 1.00 8.50
TALL OR COLUMNAR VARIETIES
This class is used for tall screens; accents in foundation plantings and specimens.
Each
5 to 6 ft., grafted plants . . . . . 5.00
4 to 5 ft., grafted plants . . . . 4.00
J. communis (Common or English Juniper). 20 ft. Native to North America and Europe. FRUITLAND has a narrow shaft-like variety not to be confused with the loose spreading typical form so often seen.
Each Per 10
8 to 10 ft... $10.00
7 to 8 ft... 8.00 75.00
6 to 7 ft... 6.00 55.00
5 to 6 ft... 4.00 45.00
2 to 3 ft... 1.00
J. virginiana (Redcedar). 50 to 60 ft. Our native "Cedar Pencil" Juniper. One of the most desirable hardy and accommodating pyramidal trees.
Each
8 to 10 ft........ 10.00
7 to 8 ft........ 8.00
6 to 7 ft........ 6.00
5 to 6 ft........ 4.00
3 to 4 ft........ 1.50
TALL OR COLUMNAR VARIETIES—Continued

J. communis ashfordi (Ashford Juniper). 10 ft. Resembles the Irish Juniper, but harder, healthier and more desirable for the South.

   Each   10
   3 to 4 ft. $2.00  $17.50
   2 to 3 ft. 1.50  12.50
  18 to 24 in. 1.00  8.50

J. communis hibernica (Irish Juniper). 10 ft. Resembles in its slender habit a small Italian Cypress.

   Each   6 to 8 ft. $3.00
   5 to 6 ft.  4.00

TALL OR CONICAL VARIETIES

In this group are the rather slow growing, long lived varieties, which may be used while small in urns and boxes. May be planted in sunny foundation groups and specimens.

J. chinensis stricta. Same as the above, but a solid, soft gray-green.

J. chinensis globosa (Globe Juniper). 4 ft. A dwarf Juniper with dark green Cupressus-like foliage. If sheared will grow in a compact globe shape.

Above three Junipers: Each   10
   3 to 4 ft. $3.50  $30.00
   2 to 3 ft.  3.50  22.50
  18 to 24 in. 2.00  17.50
  15 to 18 in. 1.50  12.50

SUGAR LOAF OR BOX JUNIPER

Juniperus communis oblonga. 10 ft. An ideal plant for hedges and for sides of steps. Stands hard pruning and sandy soil. FRUITLAND's plants are trimmed in square shapes resembling a sugar loaf or boxes.

   Each   10
   3 to 4 ft. $3.50
   30 to 36 in. 2.00
   24 to 30 in.  1.50
   18 to 24 in. 1.00

LIBOCEDRUS—Incense Cedar

Libocedrus decurrens (California White Cedar). 75 ft. A native of the west coast of the United States. It forms a compact column of lustrous foliage which holds its dark green color all the year. The bark is a bright cinnamon-red. For a specimen tree, or to give height to a large group, it is without a superior.

   Each   10
   8 to 10 ft. $7.00
   6 to 8 ft.  6.00
   5 to 6 ft.  5.00
   4 to 5 ft.  4.00
   3 to 4 ft.  3.00
   2 to 3 ft.  2.00

FRUITLAND OFFERS YOU A COMPLETE PLANNING AND PLANTING SERVICE.

THUJA—Biota

ASIATIC VARIETIES

Thuja orientalis (Oriental Arborvitae). 10 to 30 ft. A beautiful conifer without the golden tint. Variable in form, but the plants we offer are very fine and will prove most satisfactory. We shear our plants several times a year and give them plenty of space to develop, insuring a compact plant.

   Each   8 to 10 ft. $8.00
   6 to 8 ft.  5.00
   4 to 6 ft.  4.00
   3 to 4 ft.  3.00

T. orientalis aurea conspicua (Goldspire Arborvitae). Originated at our nurseries; of compact, erect and symmetrical habit. Foliage intense gold; some of its branches being of a solid matellie tint, others suffused with green. As its name implies, it is most conspicuous; early grown; and has stood perfectly in the East and West 20 degrees below zero.

   Each   4 to 5 ft. $3.50
   3 to 4 ft.  2.50
   2 to 3 ft.  1.50

T. orientalis aurea nana (Biota aurea nana). 6 ft. Introduced many years ago by Fruitland Nurseries under the name of "Berckman's Golden Arborvitae," and today is possibly the most popular Thuja for general use in the South or in the North. The golden yellow of the foliage makes a most pleasing contrast to the deep green of other evergreens. Specimens seem to be at their best when planted in well-drained soil, and because of its extreme hardiness (having stood 15 degrees below zero without damage) it may be used in almost any location. The dwarf compact habit of growth makes it ideal for small gardens, for container planting, for window-boxes and for vases.

   Each   4 to 5 ft. $6.00
   3 to 4 ft.  4.00
   24 to 30 in. 3.00
   20 to 24 in. 2.50
   18 to 24 in. 2.00
   15 to 18 in. 1.50
   12 to 15 in. 1.00
   8 to 12 in.  .75

   Each   3 to 4 ft. $2.50
   2 to 3 ft.  2.00
   18 to 24 in. 1.50
   15 to 18 in. 1.00

T. orientalis compacta. A dwarf compact grower, similar to T. orientalis aurea nana, but color bright green.

   Each   10 to 12 in. $4.50

T. orientalis Fruitlandi. 6 ft. A green type of the popular T. orientalis aurea nana. We originated this dwarf dark green variety a few years ago and have not been able to supply the demand for it.

   Each   30 to 36 in. $3.00
   24 to 30 in.  2.50
   18 to 24 in.  2.00
   15 to 18 in.  1.50
   12 to 15 in.  1.00
   8 to 12 in.  .75
THUJA—Continued
T. orientalis pyramidalis (Pyramidal Oriental Arborvitae). 10 to 15 ft. The foliage retains its bright green color throughout the year, thus avoiding the unpleasant brownish effect of some other varieties during the winter season. This fact, coupled with its compact, upright habit of growth, makes it extremely popular for general landscape plantings.

SOME OF OUR MANY 1937-38 TESTIMONIALS

I received my Camellia plants today. They were fine plants, well packed, and in good condition, and I am well pleased with them. The boards that were used for protection was a good idea. I was concerned about possible breakage.

I wish to take this opportunity of expressing my thanks to you for the speed with which you handled my order and for the excellent plants sent me. I have been buying nursery stock for 25 years—having several shipments from Pacific Coast and never have I seen plants packed as carefully as yours.

S. R. W., Newton, N. C.

The Hydrangeas I received from your Nursery last Fall are doing splendidly. They were the nicest plants I ever got through the mail.

Mrs. M. B., Charleston, S. C.

These plants arrived in good condition and I am in hopes that some day I may be able to exhibit Azaleas as pretty as those in Augusta.

Mrs. C. L. D., Dallas, Texas.

I want you to know that I have always been well pleased with the plants I get from you.

Mrs. L. D. B., Belton, S. C.

The plants arrived in excellent condition. I am certain that I will again order from your concern in the future.

L. H. L., Warren, R. I.

I want to thank you for the attention you gave my recent order for American redbud trees. The specimens are fine and are just about to bloom, and the promptness with which you filled my order is appreciated. It is a pleasure to find a Nursery which handles matters as you do.

C. A. F., Birmingham, Ala.

My splendid box of plants was received, and my delight knew no bounds. Think of plants traveling hundreds of miles, and arriving as fresh as if they had only been transported across the city of Augusta. Your method of ventilation insures plants reaching their destination in a state of almost unbelievable freshness.

Miss F. I. L., Manitou Springs, Colo.

GRAPES FROM FRUITLAND ARE UNEQUALED IN SIZE, QUALITY, FLAVOR, ETC. RAISE GRAPES FOR PROFIT.
PLANTS FOR HEDGES
from Fruitland Nurseries

- Owing to the volume production, FRUITLAND NURSERIES can give you the best and a greater variety of hedge material. In the South we can have many beautiful hedges, as there are so many lovely plants so satisfactory for this purpose. Hedges are more pleasing than fences; they are less expensive and will not wear out.

BROAD LEAF EVERGREENS
Abelia grandiflora. 100
12 to 15 in. .................. $20.00
Buxus sempervirens (Truédwarf Boxwood). 100
4 to 6 in. .................. $15.00

12 to 24 in. .............. 6.00
NOTE: The citrus requires special certificate when shipping.

Laurocensus caroliniana (Carolina Cherrylaurel). 10 to 12 in., from beds. $6.00 per 100; $4.50 per 1,000.

Ligustrum sinensis (True Amur Privet). For the South it is far superior to California Privet, which loses its leaves during winter, whereas the Amur River Privet retains its foliage throughout the entire year.

100
3 to 4 ft., well branched ...$15.00
2 to 3 ft., well branched ... 10.00
18 to 24 in., transplanted ... 6.00
12 to 18 in. .............. 3.00

CONIFEROUS EVERGREENS
Junipersus sabina (Savin Juniper). 100
24 to 30 in. .............. $12.00

NOTE: Not less than 40 plants will be furnished at the 100 price; not less than 400 at the 1,000 price.

HARDY

Ornamental Grasses

- Unusual effects and delightful contrasts can be obtained by combining Ornamental Grasses with hardy plants in the garden borders. Grasses are also effective as ornamental screens and for bordering garden pools, or for mass-planting along the walk or driveway and in groups on the lawn. As the Grasses are perfectly hardy, they live from year to year and are continually increasing in beauty and in size of clumps.

ARUNDO—Giant Reed
Arundo donax (Giant Reed). A fine hardy variety with long, green leaves.
A. donax variegata (Striped Giant Reed). A hardy, vigorous variety with long leaves, striped green and white. Very striking.
Strong roots, 25 cents each; 2.00 for 10.

BAMUSA. See Phyllostachys.

CORTADERIA (Gynerium)—Pampas Grass
Cortaderia argentea (Common Pampas Grass). Silvery, plume-like spikes of flowers. An old favorite for grouping on the lawn.
C. Ko de Roses (Pink Pampas Grass). Plumes very compact, of a delicate rose-color. A beautiful and scarce variety.

EXOTIC BAMBOOS

Few plants, not even the palms, give such a graceful tropical appearance to the general landscape as do the various Bamboos. They thrive in any location, wet or dry, but for the first and second year they must be given water during the dry periods if planted in dry places. Bamboos are desirable for screening unsightly objects, and by the third season after planting they will be effective for this purpose. The dried cane may be used for light fences, fishing-rods, and similar purposes.

Bambusa multiplex distichia (Fern-Bamboo). 12 to 15 ft. A graceful, dwarf bamboo which spreads very slowly, making it ideal for small places and for hedges and screens.

Phyllostachys aurea (Golden Japanese Bamboo). 20 ft. A graceful Japanese variety, with quantities of yellow stems and very numerous delicate branches. Leaves green and drooping. One of the hardest Bamboos.
P. bambusoides (Japanese Timber Bamboo). 30 to 50 ft. The tallest of all the Bamboos. Spreads slowly.
P. green (Green Bamboo). 30 ft. A hardy variety of rapid growth, spreading by rootstocks. Should be given plenty of space to develop.
P. henryi. 26 ft. This is a hardy Chinese Bamboo of spreading habit and vigorous growth, introduced by the U. S. Dept. of Agriculture. Young shoots are edible; canes not larger than 2½ in. in diameter.
P. nevini. From China. 15 ft. A hardy, rather dwarf bamboo of running type. Has withstood zero temperature with little injury to leaves. Canes useful for staking plants, fishing poles and other purposes on the farm.
P. nigra (Blackjoint Bamboo). 25 ft. Stems become black with age. Most unusual and scarce.

Sasa tessellata. 5 to 6 ft. A Japanese Bamboo with striking broad leaves. Eventually the plant makes a most attractive clump.

Semiarundinaria fastuosa. 40 ft. A Japanese bamboo related to our Southern Cane Reed so often used for fishing poles. In very limited quantities.

**Fruitland’s Field Grown ROSES**

Roses planted in the fall will grow and bloom better than spring planted ones. Order roses early, while selections are complete. There is always a shortage of some varieties.

**THE GEORGIA ROSES CHEROKEE**
- Pink—Anemone
- Red—Ramona
- White—Laevigata

**FRUITLAND’S OLD TIME ROSES**
- Duchesse de Brabant. Light rose.
- Cecile Brunner. Blush pink.
- Maman Cochet. Pink.
- White Maman Cochet. White.

**FRUITLAND’S FRAGRANT FIVE**
- SWEETEST ROSES GROWN
- Columbia. Glowing pink.
- Etoile de Hollande. Glowing red.
- Kaiserin Auguste Viktoria. White.
- Mme. Caroline Testout. Shining pink.
- Sunburst. Yellow and orange.

**LADY BANKS ROSES**
- True Southern Climbers
- Banksian Yellow
- Banksian White

**FRUITLAND’S RARE CLIMBING ROSES**
- Devoniensis. Creamy white.

**THE ROSE TRIO FOR THE SOUTH**
- Mrs. Chas. Bell. Shell pink.
- Radiance. Pink.
- Red Radiance. Red.

**ROCK GARDEN ROSE**

---

You Can Succeed With Roses If You Follow Our Instructions

Planting. Before planting, cut out all weak growth, leaving the stoutest and most vigorous shoots. These must be cut back to within 3 to 6 inches of the ground, depending on the vigor of the plant. Dig a big hole and set the plant about an inch deeper than it stood in the nursery row, provided it is on its own roots. Budded Roses should have the budded portion set 2 to 3 inches below the level. Fill the hole half full of soil, pour in water, let this settle, put in some more earth, firm this well about the roots, then fill in the hole and firm when the job is completed. Water the plants whenever needed, and keep the soil well cultivated.

Never use a spade in a Rose-bed, but use a digging-fork; this is less likely to cause injury to the roots. After the beds have been cultivated, rake the surface smooth and even. Frequent stirring of the surface is beneficial. A top-dressing of hardwood ashes is excellent.

Spraying. Aphis, thrips, black-spot, and powdery mildew are the chief Rose enemies. Aphis, or green plant-lies, attack the new growth of either the shoot or bud. Thrips work on the new growth, but usually in the flower, causing them to fail to open, turn brown and wither. Aphis may be removed by a strong stream from the hose. Both pests can be controlled by spraying with Garden Volck, using 1 part to 32 parts of water.
FRUITLAND GROWN ROSES

The Best Roses for Southern Gardens

“We bring roses, beautiful fresh roses, Dewy as the morning and colored like the dawn.”

We can furnish budded and own root roses. The letter B after the description denotes budded varieties and O. R. denotes own root. All roses budded unless otherwise specified.

ORDER ROSES EARLY

- Perfect flowers cannot be had when plants are set out late in February or March, and permitted to produce blooms before they are well established. If these plants are allowed to grow until the following fall and receive proper treatment, pruning, fertilization and cultivation, there will be no cause for complaint. Order early and plant early for best results.

ROSE BUSHES—Specially Tested

PINK BUSH ROSES

Dainty Bess, HT. A striking and distinct single, broad-petaled flower. The rose-colored blooms are borne in clusters and are distinguished by the large, flat group of stamens.

Duchesse de Brabant, T. Soft, light rose, with heavy shadings. Healthy, vigorous and free flowering. O. R. and B.

Editor McFarland, HT. A strong growing variety of upright habit. Flowers clear deep rose-pink. Good form.

Killarney, HT. A favorite brilliant silvery pink Rose, beautiful in bud and open blooms. Free bloomer and strong grower.

The letter following each Rose denotes its class:

T., Tea. H.Poly., Hybrid Polyantha.
HW., Hybrid Wichuralana. B., Banksia.
HP., Hybrid Perpetual. Cl.H.P., Climbing Hybrid Perpetual.
Nols., Noisette. Cl.T., Climbing Tea.
Bour., Bourbon. Cl.H.T., Climbing Hybrid Tea.
C., China. Mult., Multiflora.
Laev., Laevigata.

Columbia—Pink

Maman Cochet—Pink

Mme. Caroline Testout, HT. A magnificent Hybrid Tea of the very loveliest shade of pink.

Mrs. Charles Bell, HT. A shell-pink sport of the well-known Radiance. Very desirable.

Paul Neyron, HP. The flowers are immense, probably the largest of all Roses. Bright, shining pink, clear and beautiful, double and full; finely scented.

Pink Radiance

Mme. Butterfly, HT. A Rose that is in great demand. Sport of Ophelia, but with more blooms and more petals to the bloom. Color bright pink, with lovely deeper center.

Radiance, HT. Brilliant rosy carmine, shaded with rich pink tints; large and full. Strong, upright stems.

Sunny South, HT. Tall grower. Long stems; free bloomer. Pointed buds of golden pink; large petals.

Willomere, HT. Superb buds and blooms of richest pink, with yellow glow in center. Strong grower; persistent bloomer, but not fragrant.

RED BUSH ROSES

Charles K. Douglas, HT. Flowers large, semi-double, brilliant light crimson with scarlet undertone.

WE INVITE THE CRITICS TO COMPARE OUR QUALITY AND PRICES WITH THOSE OF ANY OTHER NURSERY.
RED BUSH ROSES, Contd.

Cuba, HT. Very large, semi-double flower, cardinal-red with a slight yellow tinge. While it is very beautiful, it fades quickly. It may be classed as a single flower, yet it is striking and beautiful. Plant vigorous, with few thorns.

E. G. Hill, HT. Great massive blooms of deep maroon, velvety on inside.

![Etoile de Hollande—Red](image)

Etoile de Hollande, HT. Flower bright red, of medium size, fairly full, delicately perfumed. Upright, vigorous plant. We consider this the best red rose grown.

Francis Scott Key, HT. Double; slightly fragrant; rich, crimson.

General Jacqueminot, HP. Scarlet-crimson bud opens into a clear red bloom. Flowers of medium size borne in clusters on long stems.

Hadley, HT. Deep, rich, velvety crimson. Well formed buds on stiff stems. Very fragrant.

Louis Phillippe, C. Dark crimson; fine for massing. Excellent bloomer. Old-time rose. O. R. and B.

Margaret Belle Houston, HT. Velvety crimson. Large, double, lasting; fragrant; good form. Long strong stems.

Red Radiance, HT. A splendid, even shade of clear red. Vigorous grower and a remarkable bloomer.

WHITE BUSH ROSES

Caledonia—White

Caledonia, HT. Large; white; full; double; high-centered.

![Caledonia—White](image)

Talisman

Talisman, HT. Golden yellow, stained with copper-red and orange; rose on the inside of petals.

![Talisman](image)

President Hoover, HT. Maroon, orange, and gold.

![President Hoover](image)

Kaiserin Auguste Viktoria, HT. Best white Hybrid Tea grown. Creamy white; very double; buds large and pointed.

White Maman Cochet, T. Pure white, sometimes tinged blush. A superb Rose.

YELLOW BUSH ROSES

Duchess of Wellington, HT. Long, saffron-yellow buds opening to very large, light yellow flowers.

Luxembourg, HT. Makes large, beautifully pointed bud, and open flower, is full and compact. A deep golden yellow.

Roslyn, HT. An excellent yellow rose; medium-sized, long-pointed bud. Flower large, semi-double, lasting, slightly fragrant, golden yellow.

Souv. de H. A. Verschuren, HT. Buds very long-pointed; opens well; flowers large, full, perfectly formed, fragrant, carmine-yellow, passing to orange-yellow, borne singly on long stems. Vigorous grower; profuse bloomer and foliage disease-resistant.

![Souv. de H. A. Verschuren](image)

DWARF POLYANTHA ROSES

Can supply these roses own root.

Catherine Zeitel (Double white Baby Rambler). This is a very profuse and perpetual bloomer; the buds are pure white, about 1 to 1 1/4 in. in diameter; plant grows to a height of about 20 in.; compact habit; excellent for a dwarf hedge.

La Marne. Dwarf, pale pink.

Orange King. Buds small; flower small, double, deep orange-yellow, in large clusters. Bushy, free bloomer. O. R. and B.

Orleans. Deep cerise, with a distinct white center, Showiest and daintiest of the Dwarf Polyanthas. Flowers excellent for cutting purposes. O. R. and B.
CLIMBING ROSES

PINK CLIMBING ROSES

American Pillar. HW. Large, single flowers of rich rosy pink, approaching brilliant carmine, with golden yellow stamens. Blooms profusely, almost covering the foliage. A vigorous grower and valuable climber. O. R.

Anemone (Pink Cherokee). (Laev.) Large, beautiful, single pink flowers.

Cherokee, Pink. See Anemone.

Cl. Cecile Brunner. Cl. Poly. Rosy-pink on rich creamy white ground, shaded light salmon. Profuse bloomer. O. R.

Cl. Mme. Caroline Testout. Cl. HT. A rampant climber; beautiful glowing pink. B.

Cl. Maman Cochet. Cl. T. An exact counterpart of the popular bush form, except that it is a vigorous climber.

Dr. W. Van Fleet. HW. Large, delicate flesh-pink, deepening to rosy-flesh in center. O. R.

Lady Gay. HW. Bright rose-pink; similar to Dorothy Perkins, but later. O. R.

Madame Gregoire Staechelin. CH.P. (The Spanish Beauty). Buds long-pointed; very large, moderately fragrant flowers of delicate pink with deeper shade on outside petals. Disease-resistant; vigorous grower; abundant bloomer.

Mary Wallace. HW. One of the best and loveliest Wichurianas yet discovered. Flowers a bright, clear rose-pink; with salmon base to the petals; semi-double and well formed.

RED CLIMBING ROSES

Climbing American Beauty. HW. Well-formed, fragrant, crimson flowers, 3 to 4 inches in diameter, in April and May. Strong grower. Holds foliage late. O. R.

Cl. Red Radiance. CH.T. Vigorous, climbing sport of Red Radiance described in bush roses.

Cl. Talisman. CH.T. Sport of Talisman described in bush roses.

Hiawatha. HW. Brilliant ruby-carmine; clear white eye. Very distinct. Vigorous grower. Almost evergreen. O. R.

Paul's Scarlet Climber. HW. Vivid scarlet, shaded crimson. Makes a brilliant display for a long time in the garden.

Ramona. H. Laev. (Red Cherokee). A companion to White Cherokee, but with red flowers.

Reine Marie Henriette. Cl. HT. Bright cherry-red; good form; vigorous habit.

Scorcher. Cl. HT. Large, semi-double brilliant scarlet-crimson flowers. Fragrant.

WHITE CLIMBING ROSES

Banksian. White. B. Small, double, white flowers in clusters. O. R.

Cherokee. White. Laev. A fragrant, pure white Climbing Rose that is thoroughly at home in the South. The flowers are about 3 inches across and borne singly in late spring. It is a vigorous and rampant grower, with shining, glossy foliage, and makes a desirable covering for pergolas and trellises. O. R.

Double Cherokee. See Fortune Rose.

Fortune Rose. (Double Cherokee). (Laev.) A double form of the popular Cherokee Rose. The flowers are 2¼ to 3 inches in diameter, similar to the White Banksian. An evergreen climber, white blooms in late spring. O. R.

Silver Moon. HW. Large, pure silvery white blooms. Vigorous growth.

YELLOW CLIMBING ROSES

Banksian. Yellow. B. Small, double, sulphur-yellow flowers in clusters. A vigorous grower. O. R.

Fortune Double Yellow (Gold of Ophir). Nois. Yellow, flaked with carmine. Suited for general planting.

Jacotte. HW. Bud large, orange yellow, opening to semi-double deep coppery-yellow, tinted coppery-red. Borne several together on long strong stem. Fragrant, profuse bloomer.

Reve d’Or (Climbing Safrano). Nois. Chamomile-yellow; large; full; fragrant; free bloomer.

LIGUSTRUM SINENSIS HEDGE—(See Page 29).
VINES
FOR SHADE, FLOWER AND SCREEN

We are fortunate at FRUITLAND to have such a variety of vines, as there are so many ways that they may be used. The Ampelopsis Decumariaria, Ficus and Ivy will cling to trees or stumps, and masonry, without trellis. The Ivy, Vines and Mitchellia are ideal ground covers for shady places. The remainder are handsome tall flowering vines. The Chinese Bellonia and Wistarias may be trained in standard forms, making lovely specimens.

AMPELOPSIS—Ivy
Ampelopsis tricuspidata (Japanese or Boston Ivy). A deciduous vine of rapid growth, suitable for covering walls, stumps, etc. Strong plants, 25 cents each; $2 for 10.

ANTIGONON—Coral Vine
Antigonon leptopus (Rosa de Montana). Commonly called Mexican Rose. The flowers, which are carried in long sprays, are bright rosy pink. It is a desirable Southern vine, blooming freely from June until fall. The foliage is heart-shaped, dense, and makes a good covering for porch or trellis. The top dies down in winter, and therefore the roots should be protected with a mulching of leaves. Growth does not begin until April, therefore shipment cannot be made until early April. Each 10
Extra Strong .......................... $ .35 2.00
Strong ................................ 25 2.00

BIGNONIA—Trumpet Vine
Bignonia capreolata (Cross Vine). A handsome, vigorous-growing evergreen, native climber, producing, in early April, a great profusion of trumpet-shaped flowers about 2 inches long, yellow-red on outside with yellow throats. Hardy in North. Strong plants from 3-in. pots, 25 cents each; $2 for 10.

B. Mme. Galen. Clusters of orangeflred flowers in great profusion from May to July. May be trained to a standard form. As a tall climbing summer blooming vine it is most beautiful. Each $.75

B. grandiflora (Chinese Trumpet creeper). A very desirable variety of medium growth. Can be kept trimmed as a bush, in which form it is very effective. Flowers very large, deep orange. Blooms from May through entire summer. 2-year .................. 75c each

CLEMATIS
Clematis jackmani (Jackman Clematis). Large, intense violet purple blooms. Free and abundant bloomer. The most popular largeflowering Clematis. Extra-strong 2-yd. plants, $1.00 each.
C. Mme. Edouard Andre. Large; viollet-red. Strong grower and free bloomer. Extra-strong 2-yd. plants, $1.00 each.
C. paniculata (Sweet Autumn Clematis). Very fragrant, white, star-shaped flowers produced in profusion during mid-summer and fall on long shoots. Handsome foliage. Extra-strong, 2-year field-grown plants: each, 35c; 10, $2.50.

Note: Clematis does best in deep, rich soil. As soon as the plants are set out, supports on which to climb should be provided.

On account of the large-flowering Clematis being hard to handle, even in packing, we cannot agree to replace any that do not live.

EUONYMUS
Euonymus minima (E. kebensis) (Baby winter creeper). A beautifully trailing evergreen; desirable for rock garden or carpeting. Leaves very small; oval; dark green, with light veins. Hardy. 25c each; $2.00 per 10.

DECUMARIA
Decumaria barbara. A native vine, almost evergreen here. Rather fragrant, white flowers in corymbs, somewhat like a hydrangea. Each
Strong plants from pots .................................. $ .50

FICUS—Cliping Fig
Ficus pumila (F. repensa). An evergreen climber with small, bright green leaves, and an excellent plant for covering walls, rocks, and rustic work. Makes a dense, dark green covering. In protected situations, the vine is hardy in Augusta. Delivery after April 1. Strong plants. 25 cents each; $2.00 per 10; $13.00 per 100.

GELSEMIUM—Jessamine
Gelsemium sempervirens (Carolina Jessamine). Our native variety. Many bright yellow, fragrant flowers, in early spring.
G. sempervirens flore-pleno (Double Yellow Jessamine). A rare sub-variety of our native Yellow Jessamine; double flowers in great profusion in early spring and more sparingly in the fall. Blooms in the conservatory, nearly all winter.
All Gelsemiums: .......................... Each 10
Extra strong plants .................................. $ .75 6.00
Strong, nursery-grown clumps .................... .50 4.00

HEDERA—Ivy
Hedera canariensis (H. algeriensis; Algerian Ivy). Very fine variety with pretty green leaves of immense size. A rapid grower and most conspicuous plant. Not quite so hardy as the English Ivy.
H. colchica. (Sometimes called Guignard Ivy). Very large, thick leaves.
H. helix (English Ivy). Too well known to need description.
H. helix gracilis (Small-leaved English Ivy). Like English Ivy, except that the leaves are small.
H. helix lobata major. An unusual light green Ivy with distinct white veins; prominently lobed. Scarce.
H. helix self branching. A new variety which is as desirable indoors as outdoors. Begins branching when only a few inches tall.
All Ivy: .......................... Each 10 100
Heavy diameter .......................... S .25 $ 2.00 $7.50
Strong .......................... .15 1.25 10.00
Extra large H. helix from 8 in. pots 50c each.

HONEYSUCKLE. See Lonicera.
JAPANESE or BOSTON IVY. See Ampelopsis.
The handsome, 100 inches $25 more 10 $15.00 shy inch 100 2.00 our of .20 4.50 $4.00 10 $1.50 25 100 4.00 10 $4.00 10 Each .25 2.00

**MITCHELLA—Partridgeberry**
Mitchella repens. A native evergreen, trailing vine, with red berries in winter.

**TRACHELOSPERMUM—Star Jasmine**
Trachelospermum jasminoides (Rhyynchospermum jasminoides; Confederate Jasmine). The best evergreen climber for this section. A very beautiful, hardy, and rapid-growing plant producing an abundance of fragrant, star-shaped, white flowers from April until July. Very conspicuous when in full bloom. Makes a thick screen.

**TRANSMERUM—Star Jasmine**
Trachelospermum jasminoides (Rhyynchospermum jasminoides; Confederate Jasmine). The best evergreen climber for this section. A very beautiful, hardy, and rapid-growing plant producing an abundance of fragrant, star-shaped, white flowers from April until July. Very conspicuous when in full bloom. Makes a thick screen.

**KADSURA**
Kadsura japonica (Scarlet Kadsura). A handsome, Japanese Climbing evergreen. Leaves 4 to 5 inches in length, dark green. The young growth of both the stems and leaves is red, giving the plant a bright appearance.

All Wistarias are grown from free-flowering plants, and these must not be confused with the Wistarias which are grown from seed.

Wistaria floribunda rosea. Rose-colored or pale pink flowers. 2-yr. only.

W. sinensis (Chinese Wistaria). The well-known, single purple variety. Free bloomer.

W. sinensis alba (White Chinese Wistaria). A beautiful graceful, white-flowering climber.

W. sinensis flore-pleno (Double-flowering Wistaria). A shy bloomer until the vine is three years old, but afterward it blooms freely.

Color: Purple.
**PERENNIALS FROM FRUITLAND**

**Brighten Dull Days and Dull Gardens with These Colorful Flowers**

**ALOCASIA**
Alocasia *macrorhiza.* (Stiff-Leaf Elephant Ear). Very large green leaves; stiff and stand erect. 50c each; $3.50 per 10.

**CANNAS**

**DIANTHUS—DAISY**
Belladonna. Spikes of clear turquoise-blue blossoms. 20c each; $1.50 for 10.

**DIANTHUS—PINKS**
Newport. Pink blossoms, excellent for cutting.

Plumarius. The old-time grass pink. We offer a mixture of single and double forms in shades of pinks and reds. Both Dianthus: 20c each; $1.50 per 10; $10 per 100.

**GERBERA**
Transvaal or African Daisy
Gerbera jamesoni hybrids. A South African spring-blooming perennial having daisy-like flowers to 4-inches across in a color range of crimson to white. Most of the blossoms will be in the lovely pastel shades. In planting, do not cover the crown of the plant as it might not come out. We offer this season a lot of heavy two-year-old plants. 25c each; $2.00 per 10; $17.50 per 100.

**Hemerocallis—Day Lily**
Hemerocallis *florham.* Golden Daylily. Golden yellow, trumpet-shaped flow-

**Gerbena jamesoni**

ers on two-foot stems, starting to blossom in late May.

H. *fulva.* Tawny Daylily. Orange trumpet-shaped flowers on three or four stem, starting to blossom in June.

H. *fulva flore-pleno.* Double Tawny Daylily. Flowers are double and begin blossoming in July.

Prices on all Hemerocallis: 20c each; $1.50 for 10.

**HOLLYHOCKS**
We offer the improved double varieties in colors of Crimson, Maroon, Pink and White. 20c each; $1.50 per 10.

**IBERIS—Hardy Candytuft**
Iberis sempervivens. Hardy candytuft. Evergreen foliage and spikes of white blossoms in early spring. Ideal for edging beds and borders. Strong clumps. 25c each; $2.00 per 10.

**IRIS GERMANICA—German Iris or Flag**
We offer the following varieties, covering a wide range of color. More of these "Poor Man's Orchids" should be planted. S denotes Standards, F denotes Falls.

**LANTANA**
One of the most satisfactory summer blooming perennials, as they stand heat and drought so well. Tops of plants die down here in winter, but with a little protection will come out again next season. We offer the following very complete list of all the old and new hybrid varieties.

A. Cook. Dwarf, claret and yellow.

Alba Perfecta. Dwarf, white; yellow eye.

Aurora. Medium, yellow and orange.

Cream. Medium, cream.

**LANTANA**
One of the most satisfactory summer blooming perennials, as they stand heat and drought so well. Tops of plants die down here in winter, but with a little protection will come out again next season. We offer the following very complete list of all the old and new hybrid varieties.

A. Cook. Dwarf, claret and yellow.

Alba Perfecta. Dwarf, white; yellow eye.

Aurora. Medium, yellow and orange.

Cream. Medium, cream.
Delicatissima. Trailing, lavender.
Dwarf Orange. Orange and yellow.
Harkett's Perfection. Tall; pink and cream.
Iolande. Semi-trailing; yellow and orange.
Juan d'Or. Medium; pink and cream.
LaPunie d'Or. Medium, yellow.
Leo Dex. Medium, ox-blood red and orange.
Mellisipolia. Dwarf, cream and pink.
Radiation. Tall, yellow.

Plants from pots. Ready April 1st.
10c each; 85c per 10; $7.50 per 100.

LIRIOPE—Lily-Turf
Liriope muscari. An Asian evergreen stemless herb. Blue flowers on spikes in July followed by black shining berries. Ideal ground cover for shade or sun.
L. spicata. One of the best evergreens for carpeting the ground under trees and in shady places where grass will not grow. Narrow grass-like leaves to 12 in. long with white to violet flowers in July and August. Spreads very rapidly, making a dense ground cover very quickly.
Each, $.25; 10, $2.00; 100, $15.00.

OPHIOPOGON—Snakebeard
Ophiopogon jaburan vittata (Snakebeard). Similar to the above, but with handsome green and yellow foliage. 35c each; $3.00 per 10.

PAEONIA—Peony
Peonies do best in rich, rather moist, loamy soil, and if plants are protected from the hot afternoon sun they will give excellent results. They should have a liberal supply of water at all times, especially when in bloom during April and May. Fertilize well with cow-manure. Keep the ground well cultivated. If these few simple directions are carried out, the result will be most satisfactory.
Edulis Superba. Pink.
Festiva Maxima. White.
Louis Van Houtte. Red.
50c each; $4.50 per 10.

PANSIES
Transplanted plants, $2 per 100; not transplanted. $1.00 per 100.

PHLOX
Phlox paniculata. Rheinlander. Salmon pink.
Phlox paniculata. R. P. Struthers. Bright, rosy red.
Phlox paniculata. Rijnstroom. Pink.
Phlox subulata rosea. 6 in. A low growing evergreen with moss-like foliage and pink flowers at the same time as P. divaricata, which makes an excellent combination.
Prices on all above Phlox:
15c each; $1.25 per 10

OUR COLLECTION—10 plants, assorted, three colors. $1.00.

SALVIA
Salvia azurea grandiflora (Pitcheri). Great Azure Salvia. A herbaceous perennial growing about three feet tall, with lovely azure-blue flowers from July until frost. 25c each; $2.00 per 10.

VERBENA
Bipinnatifida. Lacy foliage; lilac-purple flowers.
Deep red.
Lavender Oxford.
Mayflower. Pink.
Royal Purple. Deep purple.

VIOLETS
Violets. Sweet purple. $3.00 per 100.

VIOLETS
Violets. Sweet purple. $3.00 per 100.

Flowering and Decorative

Agave americana. The well-known Century Plant. Plants from 6-in. pots, 50c each; plants from 4-in. pots, 35c each.
Bougainvillea spectabilis. Crimson Lake. Known as the "Paper Vine," as flowers which are borne in terminal clusters on this vine resemble crimson paper.
Plants from 5-in. pots.......................... $1.00 each
Euphorbia splendens. The "Crown of Thorns." An unusual spiny, almost leafless plant. Covered all winter with small red flowers. A large specimen of this plant is truly beautiful. Plants from 5 in. pots, 50c each.
Ferns. Asparagus fern, Plumosus and Sprengeri. Boston or Swordfern, and Whitman or Curly fern.
Plants from 5 in. pots, 50c each.

A pool is easily made, and soon is the center of interest.
If You Plant Fruit Trees Read This Page

When to Plant. As early as possible after the first killing frost, although hardy stock can be transplanted safely at any time during the winter when the ground is not frozen or too wet. Planting can be continued until about the middle of March, or just before the buds begin to swell.

Care of Trees on Arrival. If not ready to plant immediately, dig a trench, unpack the trees and heel in, cover the roots with earth, and water freely. If trees are frozen when received, place them in the cellar or a cool room that is free from frost, and let them remain there until the frost is out. If a cellar is not available, bury the box in sawdust or dirt. If frost is drawn out slowly, trees will not be injured.

Preparing the Trees for Planting. Remove all broken roots. Cut back one-year peach, apple, cherry, pear and plum trees to a naked stem, 1½ to 2 feet high, leaving no side branches. Two-year-old trees should have branches cut back to half the length of those immediately above, then cutting them shorter as you go upward, leaving a long leader. The tree should be set about 2 inches deeper than it stood in the nursery.

Preparing the Soil. Fruit trees succeed best in rich loam, naturally dry or made so by drainage. Prepare the land by plowing and subsoiling. Make the holes at least 2 feet wide, and 2 feet deep. Cover the roots with surface soil, tamping thoroughly as the hole is filled. Use thoroughly rotted manure or bonemeal mixed with the soil. Do not put fresh manure around the roots.

Cultivation. Stir the soil frequently during the summer to conserve moisture and remove weeds. Cut suckers or branches that start below the head. Lime, bonemeal, or a high-grade commercial fertilizer may be used as required.

For two or three years crops may be grown between the trees—cotton, melons, peaches, peanuts, velvet or soy beans. In fall use a cover crop of clover, vetch, or rye, turning this under in spring.

SUMMER APPLES

Coffman (Summer Red; Coffman June). Medium large, roundish, oblong; greenish yellow, striped and splashed with red, with white dots; flesh white, juicy, good quality. Upright grower. Last of June.

Early Harvest (Early June-eating; Yellow Harvest). Medium to large; bright yellow; tender, juicy, well-flavored. An excellent home-market Apple; Invaluable in any orchard. June 5, and lasts two to three weeks.

Horse (Hass; Summer Horse). Large green; acid. Good for cooking and drying. A productive variety. July, August.

Kansas Queen. Large; yellow, nearly covered with crimson; good quality. Reliable, productive, and a good market variety. Succeeds well on light sandy soil. July, August.

Red Astrachan (Red Ashmore; Early Rus; etc.). A beautiful fruit. Large; yellow, nearly covered with crimson, and fine bloom; juicy, crisp, acid. Tree thrifty and profitable grower. Ripens end of May and continues through June.

Red June (Carolina Red June, etc.). Medium, conical; deep red; juicy. Very productive. June 15 to end of July.

Yellow Transparent (White Transparent; Grand Lathan, etc.). Among the finest summer Apples. Fruit yellow and white, crisp, slightly sour, and exceptionally good quality. Tree is a natural low grower, and bears a good crop, even when small. June.

AUTUMN APPLES

Bonum (Magnum Bonum). Medium; deep crimson; firm, tender, juicy, mild, subacid; September, October.

Grimes (Grimes' Golden). Medium; round oblate; skin yellow, with small dots; flesh yellow, crisp, rich, subacid; good; October.

Shockley (Waddell Hull; Sweet Romanite). Medium, conical; yellow, with a bright crimson cheek; flesh firm, sweet or subacid with some flavor. Trees erect, vigorous, exceedingly productive. Ripens in August and will keep until following summer.

WINTER APPLES

Delicious. Well named because of quality. A popular western Apple, but equally good in any other section. Skin greenish yellow, almost covered with dark red; flesh fine-grained, crisp and juicy. A splendid market Apple, as keeping and shipping qualities are of first rank. Tree vigorous; bears freely.

Gano (Black Ben Davis; Red Ben Davis; Peyton). Roundish, oblate, large; color deep dark red; flesh yellowish white, mild, subacid. A profitable market apple.

Winesap (Holland's Red; Winter Winesap, etc.). Small to medium; red; vinous; quality very good. A good keeping Apple.

Winter Queen (Poorhouse). Large; roundish; oblate; pale yellowish green, russet spots; flesh yellowish, moderately juicy, mild, subacid, very good. Tree vigorous, compact grower. Ripens last of October.

LOVE OF FLORAL BEAUTY DENOTES STRENGTH OF CHARACTER
CRAB-APPLES

Transcendent. Fruit sometimes 2 inches in diameter; yellow striped with red. Fine for preserving and jelly. Tree a vigorous and quick grower. Each 10-yr., well branched ........................................ $ .60 $5.00

APRICOTS

Apricots are best adapted for city gardens, or where trees are protected by buildings. They are delicious fruits, and, therefore, a little extra care should be given to protect the blooms from late spring frosts. The trees, when planted in orchards, seldom last long here, unless protected by timber or tall-growing fruit trees. Ripening period from about June 1 through July.

Each 5-ft. ................................. $ .90 

Blenheim. A strong-growing, good bearing variety. Oval-shaped, orange-colored fruit; yellow meat, juicy and fairly rich.

Moorepark (Dunmore; Temple's; Denancy, etc.). Fruit large; skin orange, brownish red on sunny side; flesh bright orange, freestone, juicy, rich and luscious flavor. Usually hardy, has produced fine crops as far north as Idaho. Late June.

Wilson. About 10 days earlier than Moorepark.

CHERRIES

Each

4 to 5 ft., heavy ................................ $ .75 $6.50

4 to 3 ft., heavy ................................ $ .50 4.50

2 to 3 ft. ........................................ $ .35 3.00

Black Tartarian. Very large; black; sweet.

Common Morello. Rich red; acid; medium size. Early June.

English Morello. Fruit medium to large; dark reddish black. Early Richmond. Medium size; light red; acid. Late May.

Governor Wood. Large; yellow and red; sweet.

Large Montmorency. The best Cherry for general use. Large; rich red. Follows Early Richmond. A good bearer.

FIGS

Adapted to a wide range of soils and climates. The trees should be planted 12 to 15 feet apart, according to character of soil, and should be trimmed to admit plenty of light and air into the center of tree. Ripening period from June to November.

Each

2 yr., heavy ...................................... $ .40...

1 year ............................................. $ .50 $4.00

Black Ischia. Medium, blue-black; good. Bears abundant crops, and is hardy.

Brown Turkey. Medium; brown; sweet and excellent; very prolific. Most reliable for field-culture.

Brunswick (Madonna; Broughton, etc.). Very large; violet; pulp thick; quality good. Productive and hardy.

Celeste (Sugar; Celestial, etc.). Medium; pale violet, with bloom; sweet and excellent. Early. Hardest of all Figs.

Green Ischia (White Ischia). Medium to large; green with crimson pulp; excellent. Middle of July until frost.

Lemon. Fruit medium to large; flattened, slightly ribbed, yellow, flesh white, sweet, early. Strong grower; prolific. A favorite for canning.

White Genoa. (White Marseilles; White Naples). Medium to large, yellow, flesh white, good.

MULBERRIES

Hicks. Fruit sweet, excellent for poultry and hogs. Wonderfully prolific, fruit produced during four months.

Each

5 to 6 ft. ........................................... $ .75

4 to 5 ft. ........................................... $ .50

PEACHES

A sandy loam is best suited to the Peach, but it will adapt itself to almost any soil, provided it is well-drained. Plant June buds or one-year old trees 18 by 18 feet; cut back to 18 to 24 inches, to have a low-headed tree. In short time after the growth has started, remove all but three branches and let these be distributed so that the tree will be well-balanced. For the first two years fertilize with well-rotted table manure, or mixture, or one part of cottonseeds or bonemel to two parts of Acid Phosphate. Apply 1½ to 2 pounds to each tree. After the third year use a fertilizer containing a good percentage of bone phosphate and potash, and a small percentage of nitrogen. Prune every year by cutting off one-third of the previous year's growth. The head of the tree should be broad and open, so as to allow free circulation of light and air. Never plant newly cleared woodlands; such lands should be cultivated for at least two years before setting the trees, otherwise wild-lice will injure them.

In preparing orchard land, plow as deep as possible, and then subsoil. Dig holes 2 feet, or use dynamite for making the holes. Cowpeas, soy beans, or velvet beans are excellent crops for planting between the trees; it is best to drill-in 2 feet apart, leaving 4 or more feet on each side of the tree for cultivation. Cultivate frequently, and in the late fall or early winter turn under the cover crop. When the orchard begins to bear it should have clean cultivation, but as soon as the fruit is harvested, drill in peas for a cover crop and turn this under as above directed.

PEACHES—Freestone

Prices of all peaches:

Each

4 to 5 ft. ........................................ $ .40 $3.50

3 to 4 ft. ....................................... 3.00 25.00

2 to 3 ft. ....................................... 2.00 15.00

Belle (Georgia). Very large; skin white, with red cheek; flesh white, firm, and of excellent flavor. Excellent shipper. Tree a rapid grower and very prolific. July 5 to 20.

Brackett. A perfect freestone; large to very large; oblong, with sharp apex and shallow suture; color orange-yellow, with red and mot. Flesh deep red, mottled dark carmine; flesh deep yellow, juicy, highly flavored, of best quality, and stands shipping well. August 1 to 15.

Carman. Large; creamy white, with deep bluish; skin tough, but flesh tender and of fine flavor. A most profitable and popular shipping variety. June 20 to July 1.

Early Rose. Early, ripening shortly after Mayflower. White; semi-freestone.

Elberta. Large; yellow, with red cheeks; juicy and of good flavor; flesh yellow. An excellent shipping variety. Mid-July.

Greensboro. Round, sometimes elongated; skin white, with red cheek; number colored, highly flavored, of fine quality, and very juicy, of good quality. Favorite and profitable for early market. Late May to June 15.

J. H. Hale. A large, smooth Peach without fuzz. Deep red; flesh yellow of fine quality. Middle to last of July.

Hiley (Early Belle). Large; white with beautiful red cheek; flesh white; quality best. Prolific shipper. Ripens June 25 to July 5. The best shipper of its season.

Mayflower (Neva-Myss; Early Wonder). An excellent variety. Fruit small to medium, round; entirely covered with red. Blooms late; very hardy. May 15 to June 1.

PEACHES—Clingstone

Chinese Cling. Very large; creamy white, mottled carmine; flesh, fine-grained, melting, vivous. July 20 to August 1.

Indian Cling. The old reliable Ante-Bellum Indian Cling. Fruit medium to large; skin dark, mottled blood-purple; flesh firm, juicy, streaked with red. Last of July to middle of August.

Kent. A most desirable variety which originated at Augusta. Fruit large, slightly depressed at apex, skin greenish-yellow, buttery and of exquisite flavor; skin very tough, but peels readily. July 25th to August 5th.

Red Bird. Large fruit, brilliantly colored, of fair quality, and a splendid shipper. Tree hardy; good bearer. June 15 to 20.
DEPENDABLE PEARS

Pears are most successfully grown in well-fertilized, heavy clay or clayey loam. The manure or litter should be worked into the soil. Mulching is of great benefit, and the orchard should be kept cultivated at all times. The list has been reduced to varieties that have proven valuable throughout the largest section of the South. Plant Standard trees 20 to 25 feet apart.

**Standard 2 yr.**
- Each 10: $65
- Each 1: $5.50
**Standard 1 yr.**
- Each 10: $50
- Each 1: $4.50
**Bartlett.** Large; yellow, flesh tender, of rich flavor. Very popular. End of July and during August.
**Chinese Sand Pear (Pineapple Pear).** Resembles the Kiefer, with crisp, juicy, coarse flesh. Fine for cooking and canning. So far it has proved to be blight-proof. July, August.
**Garber.** Resembles the Conet in size, appearance and quality, but matures here in August, between the Conet and Kiefer. A thrifty grower and valuable variety.
**Kiefer.** Fruit large to very large; skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma. Good variety. Tree vigorous and very prolific. Begins to bear when four years old. September, October.
**Konne.** Medium to large; very handsome; juicy; sweet. Tree a vigorous grower. Middle of June.
**La Conet (Chinese Pear).** Fruit large; skin smooth, pale yellowish-brown, quality very variable, but if allowed to mature slowly in a cool dark room, improves remarkably. July 20 to end of August. Trees begin to bear when five years old.
**SPI 46566.** Large roundish oblate pear with medium thick, yellowish-green skin with russet dots. Flesh white, juicy, mild flavor, sweet and fairly good quality. Introduced by U. S. Government in 1933 and is also known as "McHenny Pear".

JAPAN PERSIMMONS

The Japan Persimmon is thoroughly at home in the Cotton Belt, and does especially well in the Coosa Region. Some varieties succeed in middle Kentucky, Virginia, and in southern New Jersey. If the fruit is harvested before it is touched by frost, and house-ripened, the quality becomes greatly improved. Some varieties have dark flesh, which is edible while the fruit is still hard, but the light-fleshed varieties must be thoroughly matured before they can be eaten. In the case of early-ripening varieties, the fruit of nearly every variety begins to color when half grown, but should be allowed to hang on the trees until just this frost is expected, or in the case of early-ripening varieties, when fully matured. Many of the late ripening varieties can be kept until February. Distance for planting is 20 to 25 feet apart.

**Fuyugaki.** Oblate, medium to large; deep red skin; light flesh, non-astringent, very sweet and may be used while still hard; seedless; good shipper and keeper. September and October.
**Galley.** Mainly sold for pollination of other Persimmons and for the flowers. Fruit small, pointed end; dull red color; flesh firm and juicy. One should be planted for every ten trees of other varieties.
**Hyakume.** Perhaps the most desirable of all the round, red fleshed varieties. Fruit large, averaging 3 inches in diameter and 5 ounces in weight, usually flattened, but elliptical forms are quite common upon the same branch. Flesh bright orange-red; keeps very late; must be soft before being edible. Tree of moderate height.
**Tamopan (Big Grindstone).** Fruit bright orange-red; skin thick and tough; flesh light-colored, seedless, of excellent quality, firm; some with astringent flavor but can be eaten while hard. The tree is a thrifty grower.
**Tane-Nashi.** Large to very large, roundish conical; skin light yellow, changing to bright red; flesh yellow, of finest quality, seedless. Profuse, bearing quite young. Finest for home and commercial use.
**Tsuru (Stork Egg, Mino Kai).** Large, oblong, two and one-half by three and one-half inches, weight four to five ounces. Sometimes the fruit is almost spherical. Some specimens covered with black at apex, flesh red, very good, keeps late. Edible only when soft; foliage long and shiny, tree compact, of vigorous growth.

PLUMS FOR SOUTHERN GARDENS

**Abundance (Yellow-fleshed Botan).** Round with pointed apex, but varies from quite round to sharply pointed; skin tough, yellow, heavily washed purple-carmine, cheek dark yellow flesh, firm, yellow, juicy, subacid, with apricot flavor; clingstone. June 15 to July 5. One of the best early varieties.
**America.** Extremely handsome. Large, nearly globular, light crimson; flesh light yellow, nearly freestone; flavor unsurpassed. June 5 to 15.
**Burbank.** Resembles Abundance but shape usually more globular. Color cherry-red, mottled yellow; flesh and flavor are good, quality nearly equal. June 10 to 15. The period of maturity here is from two to three weeks later, or middle to last of July. The tree is of vigorous habit, slightly different from Abundance in foliage.
**Compass Cherry-Plum.** A cross between the Cherry and Plum wherein the fruit resembles the former and the tree the latter. Fruit about 1 inch in diameter, and about the same size as the Kousa Plum. Very good for preserving. September, October.

Combination. An extremely handsome, large, early, light crimson Plum of the very best quality. Nearly globular, uniform; flesh light yellow, nearly freestone. June 5 to 15.
**Cumberland.** Originated near Augusta. Large; yellow, juicy, sweet, good. August, September. The best late Plum for this locality.
**Methley.** Red-fleshed, red-skinned variety of very good quality; it is sweeter than many plums and has ready market value. Ripens about same time as Mayflower Peach. Fruit of medium size.
**Ogon (Shiro-Smomo; White Plum).** Medium to large, round; golden yellow; flesh yellow, firm, subacid; quality good, freestone. The best cooking plum. June 1 to 1. Tree of vigorous growth.
**Red Nagaie (Red June; Long Fruit).** Skin purplish red, with blue bloom; flesh yellow, solid, somewhat coarse-grained. Juice, large, subacid, of very good quality, clinging. Ripes a week before Abundance, and is the earliest large-fruited market variety.
**Ogon (Shiro-Smomo; White Plum).** Medium to large, round; golden yellow; flesh yellow, firm, subacid; quality good, freestone. The best cooking plum. June 1 to 1. Tree of vigorous growth.
**Wild Goose (Chickasaw Type).** Large, somewhat oblong; bright, vermilion-red flesh, juicy, sweet, of good quality, cling. A very showy and profitable Plum. Middle of June.

Purple-seeded. Large; thin rind; juice-cells wine-colored. Rhods. Fruit large; rind thin and tough; sweet; fine flavor.

ZIPHYPHUS—Raisin Tree

Zizyphus jujuba. (Chinese Raisin Tree). 10 ft. Stiff thorny branches covered with bright green shiny foliage. Bears plum-shaped fruit with raisin flavor. Fruit ripens from August 15 to November 15. Each 1 4 to 5 ft. $1.00
3 to 4 ft. $0.75

ASPARAGUS

Asparagus is considered one of the most healthful vegetables regular use, so everyone should have it fresh from their own garden. It is adaptable to nearly any soil, but grows best in rich sandy loam. Do not plant in stiff clay or hard land. Mary Washington. $1.30 per 100; $7.50 per 1000.
DEWBERRIES

Use short, stout stakes, driven at the end of each row of canes, with a cross-piece 18 in. long nailed to each stake 2½ to 3 feet from the ground. On the top, near each end of these cross-pieces, drive a stout nail, slanting toward the stake, upon which to catch a wire. Two lines of No. 14 galvanized wire, one on each side of the row, are fastened to one end of the stake and run on the ground between the rows to the other end stake. Draw wires as taut as possible, and securely fasten to the other end of the stake. The wires are now raised and caught on the nails, thus holding all the canes closely together in the row. Dewberries should be mulched to keep the berries from the ground.

BLACKBERRIES

Blackberries thrive in almost any soil, but do their best in a strong loam, retentive of moisture, tending toward clay rather than sand, but it must be well-drained at all times. Fertilizers containing a good proportion of potash are the most desirable. To prevent rust, spray with copper-sulphate solution during fall and winter, and with Bordeaux Mixture (4-6-50) during spring and summer. The rows should be 6 to 8 ft. apart and the plants from 3 to 4 ft. in the row, according to the character of the soil. If desired to cultivate both ways, set the plants in checks, 6 to 7 ft. each way. As soon as the fruiting season is past, remove the old canes and burn at once. The young canes should be clipped. This will cause them to branch and they will become self-supporting. Apply fertilizer during the late winter and give shallow and constant cultivation.

Eldorado. The large berries, borne in big clusters, ripen well together. Very sweet—no core. A heavy bearer and a valuable sort. Himalaya. Strong grower; very prolific. A desirable variety. On account of quick growth should be grown on trellis.

MERSEY: A very valuable variety. Fruit of immense size. Early and enormous bearer. Very hardy.

RASPBERRIES

These thrive best in a deep, moist, well-drained soil; the lighter loams are best for the red sorts, and the heavy loams for the blackcaps. Cottonseed meal, pure ground bone, or fertilizers containing a good proportion of potash are best and should be liberally applied during the winter and early spring. To get the best results and keep the plants in vigorous condition, they must be mulched heavily with straw.

Cumberland (Black). Very large, firm berries of high quality. The best midseason market variety, giving the utmost satisfaction to both grower and shipper.

Cuthbert (Queen of the Market). The best and most reliable of the red-fruited varieties. Fruit large, red, and of excellent quality; ripens middle of May and continues for several weeks. Prolific bearer. Fine shipper.

MISCELLANEOUS FRUITS

AUSTIN'S IMPROVED. Very large fruit. Vigorous grower and productive. The best variety for the South. Lucerina. Low-growing. In size and quality of fruit it equals any of the tall-growing sorts. Hardy and very productive, with large, showy flowers. Fruit sweet and luscious. Early.

YOUNGBERRIES

Youngberries. Fruit larger than Dewberries, with a decided flavor of rasberries. Suitable for home use, but will not ship well. Delivery in March.

PRICE ON ALL ABOVE BERRY PLANTS
10c each; 50c per 10; $6.00 per 100.

GRAPES—We Have the Best Varieties

In transplanting Grapes, leave the main branch and cut this back to two or three eyes. The usual distance for planting Grapes is 10 by 10 feet. If you want to get good results from your Grapes prune annually. The varieties here described have been thoroughly tested in this section. Our plants are strong and vigorous.

Strong plants, 35c each; $3.00 for 10; $25.00 per 100.
Amber Queen. Pale amber berries of medium size, with sweet, fine flavor. Long branches.
Brighton. Bunches medium size; berries large, reddish; skin thin; quality best. Excellent for early table or market. Vigorous.
Catawba. Large bunch and berry; deep red, with lilac bloom; juicy, vinous, and of musky flavor.
Concord. Bunch and berry, very large, blue-black, with bloom; skin thin, cracks easily; flesh sweet, pulpy, tender; quality good. One of the most reliable and profitable varieties.
Delaware. Compact bunch; berry medium, light red, quality best. Moderate grower, but vine healthy, prolific, and more free from disease than any other variety. The most popular Grape grown. Unsurpassed for table and white wine.
Ives. Bunch large; berry large, blue; skin thick; flesh pulpy, sweet and musky. Vigorous grower and prolific bearer.
Knight. Bunch compact; berry medium, blue-black. Vigorous grower. Ripens last of July; fruit matures for a long period.
Lindley. Bunch medium, loose; berry medium to large; color red; flesh tender, sweet, rich, aromatic flavor. Midseason.

WE GUARANTEE OUR PRODUCTS TO BE EQUAL TO THE BEST QUALITY OBTAINABLE
GRAPES—Continued

Moore Early. Bunch medium; berry large, round, black, with heavy blue bloom; medium quality. Early and desirable.

Niagara. Bunch and berry large; greenish yellow; flesh pulpy, sweet, foxy. Its remarkable size and fine appearance give it much popularity as a market variety. Vigorous and prolific.

Worden. Reminisces Concord, but is a few days earlier and generally regarded as a better grape.

**BULLACE, OR MUSCADINE GRAPES**

Vitis rotundifolia or vulpina. This type is purely Southern, and has a low value for the northern or western states. Vine is free from all diseases. The fruit never decays before maturity. Cultivation is reduced to the simplest form—plant from 20 to 30 ft. in row; 1 man on an Arbor crail. Each 10 100

Strong, 3-yr., heavy $ .50 $ 4.50 $ 35.00
Strong, 2-yr., heavy transplanted vines $ .30 $ 3.00 $ 25.00

**ALMONDS**

Almonds can be successfully grown in some sections of the South, but, owing to their early blooming periods, the fruit is sometimes killed by late spring frosts. The Almond requires the same cultivation as the peach.

1. X. L. A desirable California variety. Upright grower; nut large; soft shell; heavy bearer. Each 10 100

3-4 ft. $ .75 $ 6.50
3-2 ft. .50 4.50

**WALNUTS**

Juglans regia (English or Perslado).

Franquette. Requires a rich, well-drained, and preferably sandy soil. Never plant in hardpan, heavy clay, or soils which are not properly drained. In some sections of the Eastern and Southern States the English Walnut is quite successfully grown. Grafted on Black Walnut stock. 3 to 4 ft., $1.50 each.

Japanese. Particularly successful in the Southern States. The tree is very handsome and has a large, spreading top. It makes a useful as well as an ornamental tree. At three years of age a tree commences to bear. The shells are moderately thick, but the kernels are very sweet. Each 10

2 to 3 ft. $1.00 $ 8.50
18 to 24 in. .50 4.50

**PECANS**

Pecans are a paying investment when the proper stock is used and given the right soil and climate. We offer the best varieties, bearing nuts of large size, good flavor, thin shell and of easy cracking qualities, all of which are propagated from our nurseries or grown on three-year seedlings. They are hardy and satisfactory.

Plant Pecans 50 to 60 feet apart, according to soil, which should be good. Pecans grow well on rich bottom soils, on high lands of the sandy pine-lands, on sandy soil where there is clay subsoil, but not in deep and never in pipe clay or undrained land. A poor soil will kill or injure the trees and never be satisfactory. To get crops, you must cultivate, fertilize, and properly prune the trees. The Pecan is long-lived. Our trees, if properly cared for, should bear in five years, bear paying crops at eight years, and should produce 16-20 pounds of nuts per tree at 10 years.

Planting and Cultivating. After Pecans reach maturity in full, transplant any time until March. Keep roots covered with moss or wet sacks at all times before planting; they must not dry out. Dig hole for tree before exposing roots. Hole should be 2 feet wide and deep enough to set tree a trifle lower than it stood in nursery. When hole is dug, take one tree and cut off ends of broken roots with sharp knife. Cut one part of top off but not the lateral roots. Fill hole half full around roots with well-pulverized top-soil enriched with either the proper amount of well-rotted stable manure, bone-meal, or high-grade fertilizer, thoroughly mixed with the soil. Pack earth firmly as the hole is filled, but leave 2 inches of loose soil on top. When soil is very dry, pour water in the hole when partly filled. Trees over 4 feet should be cut back to 4 feet in height after planting. Be careful not to break eyes of trees when handling. Keep trees cultivated and properly pruned. When trees are 2 years old, you may plant cotton, potatoes, melons, or any cover-crop for several years, but never small grain. When trees grow to bearing, plant and turn under a cover-crop of soy beans, vetch or clover.

Excellent results are obtained in planting Pecans with dynamite—one half pound of dynamite placed 2 feet below level is ample. This breaks the subsoil, and permits the long taproot to find food on lower levels.

For fungous diseases and insects injurious to the Pecan, see Spraying Table on Page 44.

Frotscher. Very large, nuts average 45 to 50 the pound. Shell very thin; can be cracked with the teeth. Meat sweet and of fine quality, and can be removed entirely from the shell. One of the best Pecans grown, bringing good prices on all markets, and yielding profits to the grower.

Schley. Medium to large; 1½ to 1¾ inches long; oblong, slightly flattened. Shell thin; plump, rich flavor. Good grower. One of the best varieties because of size, appearance, and quality. Has few equal as a market nut.

Stuart. Nut large to very large; 1¾ to 2¼ inches long; oblong; shell of medium thickness; and of very good cracking quality. Kernel full, plump, of best quality. Flavor rich and sweet. A good grower. An excellent variety thriving over a wide section of the South.

All Pecans: Each 10 100
3 to 5 ft., heavy .12 .12 .12
3 to 5 ft., light .10 .10 .10
4 to 5 ft., heavy .10 .10 .10
4 to 5 ft., light .08 .08 .08
10 to 12 ft., heavy .05 .05 .05
10 to 12 ft., light .04 .04 .04

Plant a back yard orchard this fall. See our fruit tree values on pages 38-40.

NUTS

Flowers. Bunches have from 15 to 25 berries; black and sweet, vinous flavor. Matures from end of September to end of October, or four to six weeks later than Scuppernong.

Hunt. Vigorous grower; healthy foliage; good bearer; large black fruit; medium skin; good flavor, ripening in late August, 50c each; $4.50 per 10.

James. Berries large, blue-black, in clusters of from 6 to 10; skin thin; pulp tough, sweet and juicy, but not dissolving; quality good. A showy fruit. Ripens after Scuppernong.

Male Muscadine. Plant one of these with every ten vines to make a heavier crop. 2-year only.

Scuppernong. Berries large; seldom more than 8 to 10 in a cluster; color brown; skin thick; flesh pulpy, flavor sweet and of a peculiar musky aroma. Resists all diseases and insect depredations. Wonderfully prolific, and a sure bearer.

Thomas. Bunches of 6 to 10; berries slightly oblong, large, violet, quite transparent; pulp tender, sweet, and of a delightful vinous flavor. Best of type. Very little musky aroma. Middle to last of August.

**NUTS YIELD BIG DIVIDENDS IF TREES ARE PROPERLY CARED FOR. LET FRUITLAND SOLVE THIS PROBLEM FOR YOU**
SPRAYING MATERIALS AND SUPPLIES

It pays to spray fruit trees and grape-vines if you want the best fruit. Spraying can be easily done and spraying apparatus can now be had for a small sum. On page 44 is a complete spraying guide which gives information on sprays to use for different insects and diseases. For success in spraying, follow this guide and use the right material. It does not pay to experiment. We offer a few reliable Spray Pumps and materials for your convenience.

Sterling Sprayer, No. 115GF, Galv. Tank, funnel top, 4-gallon capacity .......... $5.50
Sterling Sprayer, No. 115GF, Copper Tank, funnel top, 4-gallon capacity .......... 8.75
Climax Sprayer, No. 135GF, Galv. Tank, funnel top, 3½-gallon capacity .......... 4.75
Climax Sprayer, No. 135BF, Copper tank, funnel top, 3½-gallon capacity .......... 7.65
Misty Sprayer, No. 452G, Galv. Tank, sturdy construction, 1-qt. capacity. .50
Misty Sprayer, No. 652B, Copper tank, 1-quart ...... .75

PRUNING SHEARS

Indispensable in every garden—you can't do good work without a pair. Pexto Shears are American-made, 9 inches long, first-quality steel, and offered at only $1.

National Eezy Wear Garden Gloves

Made from special imported hides processed to render them amazingly soft and pliable. Permit almost barehand freedom, yet provide complete all-weather protection. Ideal for garden and similar uses.

DIRTPROOF, DURABLE, and WASHABLE. Four sizes: "Small" and "Medium" for women; "Medium" and "Large" for men. 75c a pair—2 pairs for $1.50.

Miscellaneous Materials

Arsenate of Lead (Powder). 1-lb. 35c.
Black Leaf 40. Oz. 35c; 5-oz. $1.00; 1-lb. $2.25; 2-lb. $3.25.
Bone Meal. 100-lbs. $2.75.
Bordeaux Mixture. 1-lb. 35c; 4-lbs. 90c.
Fram's Tree Dressing. Pint 30c; Qt. 50c; Gal. $1.50.
Graftex (for grafting and also tree paint). ½-lb. 50c; 1-lb. $4.25.
Lables for plants. 3½ in. Copper wired. 50c per 100; $2.00 for 250.
Labels for pots. 10x½ in. 85c per 100; $2.00 for 250.
Lime Sulphur. 75c per gal.
Nutonex. 4-lb. package 60c.
Paracide. 1-lb. 50c; 5-lbs. $2.00.
Peat (Florida). $3.25 per bale (7 cu. ft.).
Peat (Imported). $3.00 per bale.
Scalecide. Qt. 75c; gal. $1.55.
Sheep Manure. $2.75 per 100 lbs.
Stimulent Tablets (Concentrated plant food). 30 tablets 25c; 100 tablets 75c; 1000 tablets $3.50.
Volck (Garden). 3½ oz. 35c; pint $1.00; qt. $1.50; gal. $4.00; 5-gal. $12.50.
Volck (Nursery) Gal. $2.00.

"GUMFINGER" LAWN RAKES

AN IDEAL GARDENING TOOL

The teeth are live, resilient rubber, stiff enough to rake clean, but flexible enough not to tear or uproot the grass.

Rakes cleanly over rough surfaces. The rubber teeth adjust themselves to every irregularity in the ground.

Light and easily handled. There is no risk of injury if this rake is left with the prongs turned upright.

Guaranteed for three years.

16-in., $1.25; 20-in., $1.50; 24-in., $1.75.

LET US HELP YOU PRESERVE AND CARE FOR YOUR FRUIT TREES
## Spraying Guide

### For Peaches, Plums, Nectarines, and Apricots

<table>
<thead>
<tr>
<th>Time of Application</th>
<th>Spray Material</th>
<th>Enemy</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Dormant spray. In late fall or early spring 3 to 4 weeks before buds begin to swell.</td>
<td>Scalecide 1 gal. to 15 gal. water, or Lime-Sulphur Solution 1 gal. to 8 gal. water. If scale is present, make application of Scalecide or Lime-Sulphur.</td>
<td>Certain insect eggs. Leaf-blister mite. Scale.</td>
</tr>
<tr>
<td>3. As soon as the petals of bloom are two-thirds off.</td>
<td>Nutonex Sulphur 2½ lbs. to 50 lbs. water. Add 1 to 3 lbs. fresh Hydrated Lime to each 50 lbs. spray.</td>
<td>Coddling moth. Curculio. Leaf-spot.</td>
</tr>
<tr>
<td>4. To 3 weeks after No. 3.</td>
<td>Same as in No. 3.</td>
<td>Coddling moth. Curculio. Leaf-spot.</td>
</tr>
</tbody>
</table>

### For Cherries

<table>
<thead>
<tr>
<th>Time of Application</th>
<th>Spray Material</th>
<th>Enemy</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. 10 to 14 days before blossom-buds open.</td>
<td>Lime-Sulphur Solution 1 gal. to 12 gal. water.</td>
<td>Brown rot. Leaf-spot.</td>
</tr>
<tr>
<td>3. As soon as the shucks (calyces) have shed.</td>
<td>Nutonex Sulphur 2½ lbs. to 50 lbs. water. Add 3 lbs. fresh Hydrated Lime to each 50 lbs. spray.</td>
<td>Brown rot. Leaf-blister. Curculio.</td>
</tr>
<tr>
<td>4. When fruit is about the size of a pea.</td>
<td>Same as No. 3.</td>
<td>Same as No. 3.</td>
</tr>
</tbody>
</table>

### For Grapes

<table>
<thead>
<tr>
<th>Time of Application</th>
<th>Spray Material</th>
<th>Enemy</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. When buds are swelling.</td>
<td>Arsenate of Lead 3 lbs. to 50 lbs. water, and Bordeaux Mixture 5 lbs. to 50 lbs. water.</td>
<td>Grape-vine flea-beetle.</td>
</tr>
<tr>
<td>2. When shoots are 1 to 4 ins. long and before blooming.</td>
<td>Bordeaux Mixture 6 to 8 lbs. water, and Arsenate of Lead 2 to 2½ lbs. to 50 lbs. water.</td>
<td>Flea-beetle. Black-rot. Downy mildew. Anthracnose. White rot.</td>
</tr>
<tr>
<td>3. Pre-blossom spray when shoots are 9 to 12 inches long.</td>
<td>Bordeaux Mixture 5 lbs. to 50 lbs. water, and Arsenate of Lead 2 to 50 lbs. water.</td>
<td>Black rot. Crowing insects.</td>
</tr>
<tr>
<td>5. Just before the grapes are large enough to touch.</td>
<td>Bordeaux Mixture 5 lbs. to 50 lbs. water, and Arsenate of Lead 2 to 50 lbs. water.</td>
<td>Ripe rot. Grape root-worm. Grape berry moth. Black rot.</td>
</tr>
</tbody>
</table>

If leafhopper or other sucking insects are present use 16 ozs. of Black-Leaf 40 to 50 lbs. water and apply when temperature is above 80 degrees, if possible. Be sure to cover under side of leaves. Do not add Lime when Arsenate of Lead is used with the Bordeaux.

### For Pecans and English Walnuts and other Nut Trees

<table>
<thead>
<tr>
<th>Time of Application</th>
<th>Spray Material</th>
<th>Enemy</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. When nuts are about the size of garden peas.</td>
<td>Bordeaux Mixture 5 to 6 lbs. to 50 lbs. water, with 2 lbs. Arsenate of Lead.</td>
<td>Scab. Case-beater. Woevil.</td>
</tr>
<tr>
<td>2. 10 to 14 days after No. 1.</td>
<td>Same as No. 1.</td>
<td>Same as No. 1.</td>
</tr>
<tr>
<td>3. 2 to 3 weeks after No. 2.</td>
<td>Same as No. 1.</td>
<td>Same as No. 1.</td>
</tr>
</tbody>
</table>

For borers, inject carbon disulphide, close holes with putty or clay.

### For Roses

<table>
<thead>
<tr>
<th>Time of Application</th>
<th>Spray Material</th>
<th>Enemy</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. When dormant.</td>
<td>Scalecide: 1 gal. to 20 gals. water.</td>
<td>Scale.</td>
</tr>
<tr>
<td>2. When insects make a appearance.</td>
<td>Garden Volck 1 part to 32 parts water.</td>
<td>Aphis or plant-lice. Leaf-hopper.</td>
</tr>
</tbody>
</table>

### Shade Trees

Are usually attacked by scale insects which may be controlled while trees are dormant with Scalecide: 1 gal. to 15 gals. water. Root-borers in peach trees may be controlled by Parazide applied in early autumn—October 10 in this locality. For table of smaller quantities, see full directions on each container sold by us.

Climbing Yellow Banksian Rose

This is one of our finest climbers. It is a mass of small double yellow flowers in clusters, and blooms in early spring. A fast and strong grower. No Southern Garden should be without one of these beautiful roses, as they make an attractive display. We have a large stock of one and two year plants.  See page 33.
